I—ANCIENT HOME OF THE ARYAY AND THEIR MIGRATION TO INDIA

BY ATUL CHANLRA GANGULY

During the latter half of the last century the philologists inferred from philological and geographical reasons derived from the traditions preserved in the Avesta that the first ancestors of the Indians, the Persians, the Greeks, the Romans, and other European races speaking Aryan Languages were living together within the same enclosures, that the home of the Indo Germanic race is to be sought in the Central Highlands of Asia, and that after their invasion of India some three or four thousand years before Christ, one section of the race passed to Persia and the others directly from their original home went to Europe, and lastly that the ancient language of the Aryan conquerors of India was the oldest branch of that primal stock which in other regions and ages developed distinctive perfections in the utterance of Plato, of Virgil or of Shakespeare The protest against the central Asian hypothesis was first raised by the modern geological archaeological and anthropological investigators The first among the causes which have led to this protest is the discovery that the present races of Europe speaking Aryan languages have been inhabiting it since the beginning of the neo lithic period whose age according to M Morlot and others, may be from 8000 to 10 000 years. Their second objection is that those who now speak Aryan languages do not belong to one race, but to several In the third place they hold that the most ancient records of any actual events which we possess are no longer the slabs with cuneiform writing disinterred from Babylonian mounds but the immeasurably older memorials of successful hunts, preserved

in the caverns of the Dordogne, which were inscribed by the contemporaries of the mammoth on the bones and tusks of extinct animals, compared with which the records on Babylonian tablets, or in Egyptian tombs, much more the traditions preserved in the Avesta, are altogether modern Last, they assert that in no part of Europe has it been proved that there was interruption of continuity between the ages of stone and metal, and there is no evidence whatever to show that the present inhabitants of Europe are not descended from the people of the neo lithic ages whose civilisation was of a very rudimentary character, and these conclusions, they say, which are now generally accepted by archaeologists, are fatal to the old theory that the Aryans were a comparatively civilised people, who invaded Europe from the East bringing with them bronze weapons which enabled them to subdue the abonginal inhabitants of Europe These discoveries have at once been followed by the abandonment of the Asiatic hypothesis by many eminent scholars who row advocate the European hypothesis

Now, although many eminent scholars are in general agreement regarding these points, the inferences which they have drawn from the results of their investigations are so very conflicting that Dr Smith has been led to write. The question of the original seat of the Aryan stock, one branch of which entered India, has given rise to many theories, which agree only in not being proved (p. 26, The Oxford Students History of India 8th Edit). Thus Topinard, a distinguished follower of Broca, remarks that it has been proved that the anthropological types in Europe have been continuous, and if the Aryans came from Asia they can have brought with them nothing but their language, their civilisation, and a knowledge of metals. Their blood has disappeared. The objection to this bypothesis has been

brought by others on the ground that there is no archaeological evidence for any such intrusive race. According to them one of the four European types, which may be traced continuously in occupation of their present seats to the neo lithic period, must represent the primitive Aryan stock But the question can not be considered as determined, the French and German scholars being ranged in opposite camps German scholars, notably Posche, Penka, Hehu, and Lindenschmit, have contended that the physical type of the primitive Aryans was that of the North Germans-a tall, fair, blue eved dolichocephalicrace French writers, on the other hand, such as Chavee, De Mortillet, and Uffalvy, have maintained that the primitive Aryans were brachycephalic. and that the true Aryan type is represented by the Gauls' (p 226, Ongin of the Aryans, Taylor) On the other hand. Prof William Ripley, the author of 'The Races of Europe', observes. 'The European races as a whole, show signs of a secondary or derived origin, certain characteristics, especially the texture of the hair, lead us to class them as immediate between the extreme primary types of the Asiatic and the negro races respectively' (p 457) He concludes that after the partial occupation of Western Europe by a dolichocephalic Africanoul type in the stone age, an irvasion by a broad headed race of decidedly Asiatic affinities took place. This intrusive element, he shows, is represented to day by the Alpine type of Lentral Europe

In a word, although the existence of an Aryan race in Europe in early Neo lithic age is established, and, therefore, the theory of Aryan migrations from an Asiatic home in later post Glucial times is untenable, it does not prove that the Aryan race is autochthonous in Europe and the question of its original home cannot therefore be regarded as finally settled. The results of the recent investigations by Prof. Arthur Keith that savagery has throughout been

co-existent with civilisation and that man has the human standard in size of brain by the commencement of the Phocene period, have complicated the matter very much, and the problem has become all the more complex and difficult, because hitherto the investigations along this line have been carried on on the belief that savagery is civilisation in embryo and that a period of not more than some 80,000 years had elapsed since humanity was represented by a forest ape. When we know that even the higher humanity is at least 400,000 years old, and that the supposed identity of prehistory among savage races is as remote from the truth as the notion that the earth is flat, we can no longer accept primitive implements of savagery as proof positive of the state of civilisation at their supposed epoch , because the implements of 'primitive' culture are much more durable than any monument that civilised man is likely to leave behind him Celts and arrow heads may survive their markers for hundreds of thousands of years, but it would be difficult to name a single article of modern manufacture which could long withstand the vicissitudes of flood and fire If then the earth was really inhabited, as for example during Phocene Age, by beings of higher mentality than any extant savage, the mere absence of material relics would not warrant the inference that they were uncivilised Even the archaeological investigations have shown the probability of the overlapping of the ages of bronze and stone The tombs which contain bronze wernons of archaic forms not infrequently contain stone weapons as well (p 128, Origin of the Aryans, Taylor)

Some scholars lay too much stress on the results derived from a study of the science of linguistic palaeontology. They have tired to show that the undivided Aryans were a nec lithic people, in the pastoral rather than the agricultural stage, and were herdsmen tather than shepherds, simply because a large

number of words common to every branch of Aryan speech refer to the cow, the terms relating to agriculture, weapons, metals, and religion having as a rule, a more limited range How fruitless are such attempts, and how extremely shadowy are their arguments and conclusions will be evident from a careful study of the Rgyeda which has been written by the Arvans immediately after their separation from the original stock recording the events which soon followed their separation, which, according to these scholars, is a production of a childlike brain. Now the fact which needs recognition is that every kind of evidence must be considered on its true ments, but instead of that we twist and distort it so as to fit it into a pre-ordained scheme. In order that we may discover the true history of so remote a period as the expansion of the Aryans, all the apparently conflicting evidences which are beyond the shadow of a doubt are to be collected and examined on their true merits and co-ordinated and harmonised into one whole in the light of some authentic written record which will be able to explain all these conflicting evidences Unless this is done, no conclusion can really be reliable and there will be room always for difference of opinion regarding many points

The study of ancient monuments writes Dr Das, the author of 'Rgvedic India, 'undoubtedly furnishes more or less reliable data for the construction of ancient history, but ancient records either on stones or papyrus or hymns committed to memory and banded down from generation to generation without the loss of even a single syllable, if such really exist would without doubt be a better and surer source of reliable histor. The ancient Egyptians had their records in hieroglyphic writing as found on the famous Rosetta stone, and on walls and monuments, and in papyrus scrolls, inscribed in the hieratic character, which was a much modified curvive form of hieroglyphic simplified in the interest

of rapid writing' These records have furnished antiquarians with abundant materials for writing a correct history of ancient Egypt In Babyloma and Assyria, the records were inscribed either on stones or clay bricks that were afterwards baked These brick tablets which once formed the library of the Assyrian King Asshurabanapal at Ninevah have been found in large numbers, and carefully assorted and interpreted by Assyriologists They have furnished reliable materials for writing a succinct history of ancient Mesopotamia" (pp 45) But the Egyptian records in hieroglyphic writing and the Babylonian brick tablets may take us back for seven or eight thousand years at the outside, and will not, therefore, help us at all in examining, co ordinating and harmonizing the conflicting results drawn from the evidences supplied by the sciences of Archaeology, Geology and Anthropology, compared with which these written records are altogether For this purpose immeasurably older written memorials are needed, and such authentic (and immeasurably older) written records are as we shall show presently, supplied by the so called hymns of the Vedas, especially the Rgyeda

'In India', as has been observed by Dr Das, 'no records either on stones clay bricks, or papyrus of the same age as the Egyptian and Mesopotamian records, have anywhere been discovered But the most succent record of the Indo Aryan culture is to be found in the sacred Scripture, called the Rgweda Samhita. The hymns, however, were not committed to writing on papyrus, palm leaves, or baked clay bricks, but to human memory carefully cultivated for the purpose, and were handed down from generation to generation without the loss of even a single word or syllable. The ancient Indo Aryans probably thought this to be the surer and better method of preserving them from perishing in a world where everything either stone, brick or papyrus

perishes, excepting the human mind and soul. And herein probably lies the fundamental difference unfortunately overlooked by the European scholars, between the spirits of pure Aryan and pure Semitic or Turanian civilisation This intuition on the part of the ancient Indo-Aryans, of the superiority of mind and spirit over matter very probably accounts for the absence of any material proofs of their antiquity, which can directly appeal to an ordinary observer or antiquarian The proofs they have left are altogether of a different kind, which can only be correctly read by those who are endowed with a far greater amount of patience, diligence, perseverence, and capacity for taking pains than is required in deciphering a clay tablet or a stone slab, and in fixing the age of a broken statue, or a stone monument. It is because these proofs do not appeal to the senses that they have not hitherto received that amount of attention which they emmently deserve Even those who, by dint of their wonderful diligence and perseverence were able to master it, could not always get at the real spirit underlying the hymns, probably through bias, prejudice and preconceived ideas, with which they started their study and enquiry These have, in many instances, blinded them to the real import of passages which, read in the light of modern scientific knowledge in the domains of Geology, Archaeology and Ethnology, could have put them on the right track, and led them to the discovery of great historical truths' (pp 5, 6, Ibid).

The perusal of the first few chapters only of the work of Dr Das will show how immeasurably old are the memorials preserved by the Vedic Riss in their sacred terses known as the Rks in which have been preserved the records of an age when there was a different distribution of land and water. Subsequently we shall show that all the endences point to a period of time, which must undoubtedly

(0

be placed, geologically speaking, before the close of the Pleistocene era. We shall now confine ourselves to the task of evamining what the Vedas, especially the Reveda, have to say regarding the 'Ancient home' of the Aryans, and evamine them and bring; into their proper relations the apparently conflicting results arrived at by the archaeological, geological and anthropological investigators in the light of these records.

Now we cannot pass on to our task without noticing a recent work on Revedic India published by the Calcutta University, from which we have already quoted The subject matter of the book is that the original cradle of the Arvans was the Punjab (se Sapta Sindhava, as it used to be called in Revedic times), which included Kashmere on the north and Gandhara on the west In Rgvedic times the southern boundary, according to the learned author, was the Kajputna sea and the eastern boundary the Eastern sea covering the Gangetic trough The author has tried to show that 'the Aryans were autocht honous in the Punjab, or at any rate had been living in the country from time immemorial,' and that their immigration, therefore, from central Asia, Northern Europe, or the Arctic region, is very improbable. He has given further shock to the western scholars by requesting them to carry the development of human civilisation in India back to hundreds of millenniums He has arrived at his result from his own novel interpretation of certain references in the Rgveda which, according to him, can only be understood in the light of the results of modern geological investigations. Although there is some definite suggestion that the southern part of the Raspinium desert was a very shallow sea in ancient times there is absolutely nothing in historical tradition to support the conditions conjectured by Dr Abinash Chandra Das (msp at p 90), and the whole of tradition negatives them

The most precious legacy which Dr Das has handed up to us is, however, the line of research he has adopted in his book, which, if properly worked out, will yield valuable historical truths. He has inaugurated the method of finding out historical truths from the Veda read in the light thrown by the results of modern geological investigations, although here he has received some valuable hints from Mr Pavgee's works, 'Aryavartic Home' and 'Ved c Fathers of Geology'. He has even adopted 'ome of the interpretations of the Vedic hymns offered by Mr Pavgee

We shall now see how Dr Das has summed up his argu ments from internal references in the Rayeds, and then examine them critically to see how far these go to prove that the Aryans were autochthonous in the Punjab, the oldest life producing region in India, and that they did not settle there as colonists from any other country. The author has summed up his arguments thus (1) There were four seas round about Sapta Sindu, a fact which is confirmed by geological evidences, (2) the region was peopled by the Aryans from time immemorial, and they came to regard it as their original home ,--- none of the Sanskrit books contain any reference to the foreign origin of the Aryans, (3) the region between the Indus and Sarasvati was regarded as the rod (ashioned land, the land in which the Aryans were born again and again, and it is significant as pointing to the belief of the ancient Aryans that they were autochthonous in Santa Sindhu . (4) the region of 111, which was as old as that of the Sarasvall, was situated high up in the Himalaya. probably in Kashmere, and was the country where Daksa Prayloats and Manu lived, (5) India was one of the oldest gods of the Aryans, to whom were ascribed the volcanic actions resulting in the tossing up of mountains, the depres sion of high lands and carving out of paths for the Indus in other rivers, which carry us back to the beginning of

human life on this globe', (6) it was in Sapta Sindhu that the first great exploits of Indra vis, the killing of Vrtra, was performed, (7) the total absence of the mention of deluge in the Rgweda proves the period of the composition of the hymns to be anterior to that event', (8) the soma sacrifice was the oldest sacrific e amon, the Aryans, and the genuine Soma plant grew nowhere else excepting the Himalayas, and (9) fire was first kindled in the region of the Sarasvati 'All these evidences, says the author, 'unmistakably point to the vast antiquity of the Rgweda and of Sapta Sindhu, and go to prove that the Aryans were autochthonous in the Punjab'

Although there were in ancient Rgyedic times, four seas, as we shall show later on, round about the region known to the ancient Aryans as Aryavarts, he has not produced sufficient evidences to prove conclusively that there were four reas round about the region of Sapta Sindhu The mere mention of four seas in Rks, IX 336 and X 472 does not establish his theory that the four seas mentioned in the Rgveda were respectively the large Asiatic Mediterranian sea extending from the province of Balkh to the heart of Siberia and from the confines of Mongolia to the Black sea. on the north the Eastern sex covering the Gangetic trough on the east, the Rajputana sea on the South and the Arabian sea on the west. Moreover the existence of the four seas round about the region in which the Ary ins lived does not prove that the Aryans were sutochthonous in the country. and that they did not se the there as colonists from any other land, it can only point to the period of tim when those Arrans lived in that region

While examining his next point of argument we shall try to establish our theory that the In o Aryans were colonists from a country the mention of who e name has distinctly beer mid in the Riveda and that it contains distinct reminiscences of the life of the Aryans in that country His next point of argument is that none of the old San-krit books contain any definite reference or allusion to the foreign origin of the ancient Indo Aryans, because, the author argues, the region had been inhabited by them from time imemorial and they came to regard Sapta Sindhu as their original cradle Here Dr Das, to support his view, has cited the authority of the eminant Sanskrit scholar Muir. as if Muir cannot err. This statement of Dr. Das and others goes direct against everything of which we find mention in our oldest books. This he has supported by the argument that as the Aryans regarded Brahmasarta as the Deva created land, the land in which the Aryans were born again and again, it is significant as pointing to the belief of the ancient Arvans that they were not colonists from any other country There 15 definite mention of the Ancient Home or dwelling place of the Aryans in the Reveda Thus in Rk, I 30 9, we find mention of 'prainasya ozasah, which undoubtedly means 'Ancient Home (putatanasya niva-asthanasya, Sayana and Ramanatha) Sayana has also pointed, following no doubt the footsteps of the traditional school, that this 'pratnasya okasah refers to Syarga, the Home of the Devas pratnasya okasya huve tuvi pratim naram yam te pûrvam pith have Translated this would mean, 'My father sang before in praise of you who are the protector and lord of the 'Ancient Home now I also do the same' This 'Ancient Home was the abode of the Devas and the original abode of the composer of th Rguedic hymns. Hence it follows that Svargs (Dyau or III) is our original abode. This statement is supported by the RL, 1 164, 33, in which definite mention has been made that 'Djau is our fatherland (pith). our bitth place (janith) and our original bithplace (nabhi = utpattisthluam, Sayana Vide his comments on RL A, 10 4)'.

II A SATRAP COIN

BY SHIAM LAL MEHR

, INTRODUCTION

The coin was found in a small village in the Vijapur Taluka of the Baroda State The find place is quite near Ahmadahad

The coin no doubt belongs to some one of the K-strapa runter of Malwa-hathuwar, as the bust of the prince on the obverse with the date, though rubbed out, and a Stupa like emblem with a way line below and the crescent at the top on the reverse, clearly point out. The face, head dress, and the long hair of the King resemble those found on the K-satrap cames found and identified before

The front portion of the King's bust appears to have been broken, and the legend on the obverse and a portion of it on the reverse have been rubbed out of existence on account of its brisk circulation.

PALAEOGRAPHICAL NOTES

The Script of the legend is Brahmi, and most of the letters on the reverse can be read with ease. They are —

"(च) (त्र) पसरदस (ह) पुत्र सरा हो (म) (हा) (च) (त्र)"

Now, excepting seven letters the rest are clear. The first two and the last four have been guessed from what has been spared to us of the original letters from the ravages of time. The lower portion of the letters affords us the greatest help in surmising what particular letters there were in those places. But there is some difficulty in deephering the third and the fourth letters from the last. Any casual observer may hirrically combine them with the lower curve

of the following (a), and jump to the conclusion that there are no such letters as (#) (#1), but it is only one word, viz, (इ). But when the letters are carefully examined, it would appear that all those three letters are disjoined Between the lower point on the right side of the fourth letter, and the remaining curves of (ল) and (ল) there is some space which clearly indicates that they are all separate letters. Thus it can be safely assumed that the last four letters are (ম) (মা) (মা) (মা) But there is one letter left which requires some attention. It is the eighth letter from the beginning, viz, (ह) At the first sight this appears to be न, and people can hastily conclude that the coin belongs to the 'son of Rudrasena' But on a critical examination of the letter, it becomes evident that the curve at the end of the letter is on the right side, like g, and is not rounded on the left side which is usually found in the # of those times (Cf 'The Palaeography of India' by R B Gaunshanker Otha, plate X) By comparing even the same letter, 1. e, (g), with those found in the inscriptions of various Keatrapa kings, both earlier and later, it becomes quite clear that a slight curve on the right side was an essential feature of g, and that on the left side a sure accompaniment of a (e g in Rudradama's Girnar Inscription shapes of a and g and in later Ksatrapas also) Even by comparing this . letter with a found in the names of various princes bearing the designation of Rudrasena, we find that it does not resemble them, and hence we are naturally forced to read it as g. Thus it is clear that the coin belongs not to the 'son of Rudrasena', but to that of Rudrasinha

Coming to the general nature of the letters, we find that they do not possess any of the characteristics of those found on the coins of the earlier Katrapas That archaic tendency of letters is missing too The figure of the Chutya which was made of round curves in the earlier coins does not appear in the con under discussion. In it the Chattya has been represented merely as a triangle and the moon by a very small line. This too points out that the coin belongs to some later Keatrapa.

The letters are proportionate, clear and well-embossed.

IDENTIFICATION.

Now, it remains to be determined as to which prince this coin belongs. There were three famous Ksatrapa kings, each of whom had some Rudrasiutha for his father—

- (1) Rudra Sena I, son of Rudra Simha I-A D 199-222
- (2) Dama Sena, son of Rudra Simha I-A. D 223-236
- (3) Yasodaman II, son of Rudra Sunha II A. D. 317-332
- (1) Let us compare the coins of Rudra Sena I (Rapson's Catalogue, plate XII) with the coin under discussion. The characters of Rudra Sena's coins, though Brāhmi in script, are more archaic. The crescent and the chaitja are more regularly circular Moreover the face of Rudra. Sena does not resemble that of the prince of our coin.
 - (2) Dama Sena s coin also does not resemble the present coin, and the reasons are mostly the same as mentioned above
 - (3) The come of Yasodaman II betray many similarities. The letters resemble, the stamping devices correspond, and even the two faces betray similar facial characteristics, and I first had come to the conclusion that the present combelonged to Rudra Simha II's son, Yasodaman II. But later on I found that I was mistaken, and the error had resulted from my incorrect reading of the last four letters. When

after careful conside ation I discovered my mistake and came to believe in the present reading, I found it difficult to attribute this coin to Yasodaman II, who was never a Mahaksatrapa while the present coin was issued by a prince who appears to have been a Mahak atrapa

Who was this king who resembled Vasodaman so much and whose coin also resembled those of Vasodaman? The only difference between them was that the former appears to have been styled Mai al satrapa while the latter was designated merely as Katrapa. We hear of one prince, named Svami Rudradaman II who came immediately after Yasodaman II, and was the first Mahaksatrapa since the time of Bhartrdaman. His reign , according to Rapson, "must fall somewhere in the period between the years 327 A. D. and 358 A. D. Unluckily no coin or inscription belonging to this prince has been brought to light, with which the present coin can be compared. But the fact that Svami Rudradaman II came soon after Yasodaman II comes to our help in establishing the identity of the prince of the coin under consideration.

A coin which greatly resembles those of Yasodaman II must be of a prince who might have flourished about his time, and there is no harm if a conjecture be hazarded that Syami Rudra I man II was the prince who issued this coin, and if this conjecture is believed the difficulty about his par entage is removed and a fresh light is thrown on his domestic relations revealing him to be a son of Rudra. Simha II and a brother of Yasodaman II

SVAMI RUDRA DAMAN

After the troublous times were over and Asatrapas Rudra Sithha II and Va odanian II restored peace and order in their kingdom Svami Rudradaman, presumably a son

of Rudra Simha II came to the throne and augmented the limits of his territories and assumed the title of Mahakşatrapa

Syamt Rudradaman II appears to have possessed long hair, big ear lobes and prominent moustaches. His eyes were bright his forehead projecting and his nose not unfairly small. From his face he appears to be stout, with a character easily swayed by emotions. Though no sugrousness shines out from his face, yet it reflects some of the sterling qualities of his race—humorous disposition, brivery, and good nature.

GENERAL REMARKS

There is a general belief that soon after Mahaksatrapa Bhartrdaman, the Satraps had to face some foreign invasion, and in some of their remote provinces and chiefly Gujerat, their authority was weakened. But no convincing evidences are produced for this theory. Only because two of the princes of the new family did not use the title of Maha keatraga, Rapson and others have thrown out the conjecture that they were attacked by foreign imaders and that their authority was not recognised in distant provinces Troubles there might have been at that time for it is very natural that when one family supplants another, it is not usually by persuasion, but by the force of arms The two Satrans of the rew line viz. Rudrasi sha II and Yasodaman II were engrossed in the consolidation of their power and as a strong opposition was offered to them they did not feel themselves confident to assume the supreme title of Mahakatrapa and were content to be called more hatrapas After them, when Saami Rudradaman II took the reins of government in his hands, the opposition was crushed and the position of the new family became secure, and Stam! Rudendamin took the title of Mahakatrapa Thus we find that the idea of a struggle between two sections of the

same family, followed by the necessary commotion in the country, is more probable, and quite in accordance with numismatic evidences

III. AN ESTIMATE OF

THE CIVILISATION OF THE VANARAS

AS DEPICTED IN THE RAMAYANA.

By Manmatha Nath Roy.

INTRODUCTORY NOTE

The following paper from the pen of Mr. Manmatha Nath Roy, M.A., is an interesting contribution on the study of an aspect of the cultural history of ancient India The paper is based on the Ramayana and deals with the civilisation of Vanaras, whom the writer identifies against the views of many with the Vratya Aryas rather than Dravidas or aborigi nes. His second paper, to be published in the following pages shortly, is a similar attempt based on similar data to treat the history of the Raksasas It is needless to add that no study of ancient Indian culture can claim to be complete unless it takes note of the different elements of Indian People The writer has been laboriously working as a Research Scholar for over two years in the Research Library. attached to the Govt Sanskrit College, Sarasvati Bhayana. Benares He has prepared a complete descriptive Index, almost cyclopaedic in its range and thoroughness, with a synontic analysis of the contents, of the Ramayana, arranging all the information available in the book under certain leading words. He has been doing the same work with all the Mahapuranas and Upapuranas It is an arduous task, taxing the patience and energy of a diligent worker, but when completed, as I hope it will be within a couple of years more, it

will mark a brilliant achievement in the field of Indian Scholarship I can only hope that the work will be carried through The paper on the "Vānaras" just published is a specimen of the Rāmāyanic Studies

Sanskrit College, Benares

term is never static in sense

G N KAVIRAJ

benares *

The word civilisation is a relative term, and as such it does not stand by itself. On the other hand it is closely connected with many things that vitally affect the well being of a certain people. Again, it is never static in sense, it does not denote a status quo, it never signifies complete and absolute rest. On the other hand, it is dynamic by nature, it is replete with the thrill of life, it connotes continuous motion of the state of the

replete with the thrill of life, it connotes continuous motion of a certain people from one stage to another in a vain struggle to reach the ideal, the outlines of which, though vague and hazy ultimately seek to elevate the individual self through the well being of all the members

And it is this goal towards which each and every society. however crude moves slowly, and it is the consciousness of this goal, however dim it may be and however vague its ultimate realisation, that together with the reminiscences of a brilliant past, give an external binding to the members of that society, which goes by the name of social organisation. In a savage society nobody respects the rights of his neighbour. There might is right. But as it advances through the process of evolution, the idea slowly dawns in the mind of some its members who try to communicate it to the slowly understanding, dumb masses These men are known to history as the pioneers of civilisation Thus civilisation may be defined as the process by which each and every member of a particular society tries to elevate his individual self with the active help and to operation of his neighbours. Then, as it advances, it comes to include the whole humanity, for the

If it is so, than why should the subject matter of the present paper make men laugh in their sleenes? For were not the Vinarus of the Ramajana is good breathing and feeling beings as we are? Had they not a glorious past to beast of? Had they not a peculiar social organisation of their own, and a peculiar colture which was all their own? It is just possible that their civilisation may be found wanting in certain respects when compared to those of the Aryas of the Madhya Desy and the Rāksasas of Lanka, yet there could be no denial of the fact that it was a civilisation—grand in its simplicity!

At the outset it must be told that Valmiki, the reputed author of the Ramayana, tried to pre ent these Vanaras as semi divine beings, who had graced this vile earth with the sole object of helping Rama to bring about the destruction of Rayana and his despicable accomplices who had for a very long time bun terrorising over the innocent Rsis and Munis, who acted as the standard bearers of the civilisation of the Arvans in the distint and till then unexplored regions of Daksmapatha We are told that "when Visou had talen his birth as a son of Da aratha, Brahman asked the assembled Devas to produce Vanara children on the leading and reputed Apsaras, Gandhars is Yake and Naga girls, she bears (ME), Vidyadharis and Linnaris, and on the foremost of the Vinara ladies, so that they might give adequate help to this well wisher Vispa In this connection these Vanaras are said to have been strong, assuming forms at will, proficient in performing miracles brave swift like \$1 nu, indestructible, resourceful, possessing divine forms and knowing the use of all weapo is like the nectar consuming gods (1 17 1-6)"

Unless otherwise mentioned, the references are to the Rim ya a (Bornbay Edition)

Then we are told how Bruhman produced Jambavana, the chief of the bears, from a yawn, and how in accordance with the expressed desire of Brahman, the Devas, the high-souled Rsis, the Siddhas, the Vidyadharas, the Nagas and the Caranas—all proceeded to produce Vanara children Of these we are told that Indra produced Valin, Sarya produced Sugriva, Vrhaspati Tara, Kuvera Gandhamadana, Visuakarma Nala, Agni Nila, the Aswin twins Mainda and Dvida, Varuna produced Sugena, Parjanya Sarava, Maruta Hanuman, and so on (1 17 7—17)

Further on we are told "that on this occasion full one Kror of Vanaras were produced by various agencies —Vanaras, who could assume forms and increase their strength at will and could move about without any restriction, approaching lions and tigers in the fields of strength and pride, well, versed in the use of all arms, who fought with huge stones and hillocks tooth and nail, powerful enough to displace mountains, uproot steady trees produce agitation in the bosom of the occan, ten open the earth with their feet, swim across the seas, soar through the sky, hold (the flow of) water, capture the elephant roaming freely in the forests and bring down the winged beings by their cries" (1 17 24—29)

Enough has been said above in support of the fact that whit Valimiki really intruded was to present these Vanaras as semi-divine being. But underneith this seeming finery and frippery there flashes forth, here and there, the crude flesh of the final earthly being. And it may not be out of place to mention here that the aim of the presert paper is to deal exactly with the kind of life led by the Vanaras of the Ramayane Age. We are not out to day to study the physiognomy of these much—condemned creatures, nor will we try to give an accurate measurement of the length of their tails.

Though not belonging directly to the field of our present whit they look-the enquiry. I introduce the present topic simply because it would furnish an interesting reading. Again it is only common sense that prompts me to describe what our heroes exactly looked like, before proceeding to describe how they lived. In so doing I shall play the painter who with a few careless strokes of his brush produces a finished picture.

We are repeatedly told that the Vanaras nere कामकपिए: (1. 17. 18, IV. 19 10), that is, they could assume various forms at will, सुद्धाः सम्प्रवास्त्रात्तिः (IV. 26 4), having well set teeth and might, . रामद्वारा विस्तिवस्त्रामामाः (IV. 31 2 3) looking like elephants as big as mountains and clouds, they made the bair stand on the end. In another connection we are told—

> नप्तदंष्ट्रायुधा सर्वे वीरा विकृतद्र्यनाः। सर्वे शादृंबदंष्ट्राञ्च सर्वे विकृतद्र्यनाः॥ दशनागवलाः फेविन्हेचिदशगुणाच्याः। केविकागसद्द्रस्य बमुबुस्तुत्ययर्चसः॥

> > (IV 31 24-25)

The heroes having teeth and nails for their weapons presented a h deous appearance. All were furnished with teeth (shirp) like those of the tiger, hence terrific—looking Some were in possession of the strength of ten elephants, some equalled a hundred elephants, while others were more than a match for a thousand!

Again in connection with the description of Sugriva's palace, we are told that it abounded with

देवगन्धर्वपुत्रेध्य यानरे कामस्यिभिः। दिव्यमालाम्यर्घरेः ग्रोभितां प्रियदर्भने ॥

(IV. 33. 6)

noble looking Vanaras, all descended from the loins of Devas and Gandharvas, who could assume various forms at will, wearing unfading garlands and clothes. Then in connection with the general mobilisation of the Vanaras at the command of Sugriva, we are informed that

> वते। नरेन्द्रसंकाशैस्तीक्णदंष्ट्रैर्महावले । कृत्स्ना संद्वादिता भूमिरसंज्येये: प्रवहमें ॥

> > (IV 39 10)

the whole surface of the earth was covered with numerous powerful and princely Vanaras furnished with sharp teeth

Again, in connection with the same we are told that the mobilisation order issued by Sugriva was conveyed by Vanaras पतित्रचे।तिरस्त्रमा , who could som through the ærial regions (IV 37 17) Then, of the Vinaras who mustered strong at the desire of Sugrier in Kiskindh's we are told that these were

> त इमे बहुविकान्तेर्वितिभर्गीमविकमे । श्रागता वानरा धारा दृत्यद्गनवसनिभाः॥ रयातकर्मापदानाश्च यलपन्ता जितक्कमा । पराक्रमेषु विष्याता व्यवसायेषु चालमाः ॥ प्रथिव्यम्बचरा

> > (IV. 40 3-5).

h

strong, vigorous and during like the devil himself, powerful. untiring, valuant and patient that they had achieved numerous successes and could move about in water and on the dry land! Then, on the eye of the battle, while Sarana was introducing various Vinara chiefs to Rivana, he used a very significant word. In connection with the description he gave about the Vanara chief Sannadana, he said that

> यस्मात्त् परम रूप चतुष्पात्स् न विद्यते । धतः सनादने। नाम यानराणां पितामधः॥

(VI. 27 18)

there stood Sannidam, the Nestot of the Vānaras, who excelled all other quadrupeds in personal beauty. In so saying he clearly included the Vānaras in the class of beings known as the four-footed ones.

In another connection these Vinaras have been described as तात्रवद्गाः हेमामाः copper-faced and gold coloured (VI 42—14)

Lastly, more than once we are assured by the poet that these Vanaras had that delicate appendage attached to their body, which goes by the name of 'tail' We are told for instance

सर्वे विद्यतन्तांगृता सर्वे दंष्ट्रानदायुधाः । सर्वे विकत्वित्राहाः सर्वे च विद्यताननाः ॥

(VI 41 46)

Before the opening of the battle all the multi-coloured Vănaras stood ready for the contest with wry faces and ugly tails, having teeth and nails for their weapon

Then the episode of setting fire to Hanuman's tail by the Räkasas is so well-known that it hardly needs any repetition (V 53).

In that connection says Ravana

कपीनां किल लाइलमिष्ट भवति भूषणम् ।

The tail is the highly prized and favourite appendage of the Vaniras. In another connection we are told that

नीरुजा राष्ट्रजा हुप्ता नने। वानरय्यपा । सिंहनादं तदा नेदलींगूलं दुषुबुश्च ते॥

on finding the Rāghava brothers completely restored to health (by favour of Gadura), the Vānata chieftains expressed their joy by routing aloud and shaking their tails?

At this place a word or two about this nature may not be wide of the mark. The outstanding characteristic in their nature seems to have been Theath or flightness. Rāma accuses Vālin of this drawback in his character (IX. 18. 5). Hanumān himself testifies to this weakness in the character of the Vānaras, when he speaks to the despondent Angada in this strain—

नित्यमस्थिरचित्ता हि कपया हरिपुङ्गव । नाहाप्यं विसहिष्यन्ति पुत्रदारं विना त्वया ॥ (VI. 54. 9)

O chief of the Vanaras, your kinsmen are naturally fickleminded and when separated from their wives and children they may not tolerate with your commands. Elsewhere Rāwaṇa's spi, Suka, de cribes them as

प्रकृत्या के।पनास्तीदशा यानरा राह्मसाधिप ।

wrathful and rough by nature. Again Ravana pays the the following compliments in the course of his conversation with Prahasta,

चपला द्यपिनोताश्च चलचित्ताश्च धानराः ।

(VI 57.9)

the Vanaras are by nature, volatile, fickle-minded and unmethodical But for this drawback in their nature, the Vanams have been praised for wishing well of their masters (गुरुष्टिने स्थिता), obedient (निरंश्यितः IV. 40. 6), daring and persevering (पराममेषु स्थाप्याता स्थयसायेषु नेगसामा: IV 10 4), swift (महाजया: IV-37-10), irresistible (द्रश्यसदा), and powerful like the bods in the battle-field (युद्ध येषपराथमा: , VI 28 3)

Before closing the tops t should like to dilute a little on the sure of the Virana. The poet, it must be noted, is sulent on this point. On assembly the uses such ap theta as a sulent on this point. On assembly, a string Emparified VI. 25. 25, the mod elephones, like the basical trees of the Gangine regions and the Sal trees growing on the Himshapa.

महारोलनिकाश्रकाया: (VI.27.48), huge like the mountain; उत्तमस-मातद्वसदिमा (VI.27.41), like mad elephants, महाप्यतसंकाशा महाजीम् तिस्यता: (VI. 27. 42), like huge mountains, roaning aloud like the rumbling clouds, to indicate the size of these Vanaras. But, I am afraid, the poet in his admiration for these creatures, has lost all sense of proportion here. He hardly states the fact. But light hails from other quarters. The Vayu Purana lays down the standard height of almost all creatures and there we find the undermentioned couplet:

> श्रंगुलानां सहस्रन्तु चत्यारिशांगुलं विना । पञ्चारतं ह्यानाञ्च उत्सेथः शास्त्रिनां स्मृतः ॥ (Vavu 59.12)

The standard height of the horse should be a thousand finger-breadths less forty, and that of the Vanaras fifty finger-breadths.

But I am inclined to think it was neither the one nor the other. The one is highly inflated, while the other seeks to depreciate the Vānaras of the Treta Age. Therefore in accordance with the view expressed in the same Purana that "every created being changes its size at the end of each cycle "(Vāyu-59-10, called गुपाय्चा by the Vivou Purāṇa II. 1. 27) I hazard this opinion that the truth lay somewhere between the two extremes, and that the Vānaras of the Tretā Age were certainly over 50 finger breadths in height, though smaller in size than the elephants and the hills '

Num'er and habitate—It is sheer waste of energy to ransack the Rimiyava for discussing the exact number of the Vanara contemporaries of Rams, for before composing his immortal poem, Valmiki never cared to take a ceasus of these creatures. Yet by gathering together the pieces of information scattered throughout the book, one is just able

to form a rough estimate about the Vānara-population of India in the Tretā Age. Alongside with this we shall also tell our readers where they came from,

When Laksmana on the expiry of the rainy season wrathfully approached Sugriva to cell for an explanation for his dilatoriness in giving and to Rāma as had been promised, Tārā hastened to olicate him with the following words—

> कता सुसंस्था सीमित्रे सुप्रीवेल पुरा यथा । श्रश्च तैः वानरेः सर्वेरागन्तव्यं महावतैः ॥ श्रश्चकोदिसहस्नाणि गोलांगूलगतानि च । श्रश्च त्वामुपयास्यत्ति बहि कापमित्द्वम् ॥ कादयोऽनेकास्तु काकुरस्य कपोनां दोवतेजलाम् ॥ (IV. 35. 21 22)

As had been arranged previously by Sugriva, the Vānar were due that day. 1000 Kous of Rksas (bears), 100 Kous of Goläagala Vānras, in addition to many kous of illustrious Vānatas were expected to arrive that day.

When the general mobilisation order issued by Sugriva reached the ears of the Vānarus, the number that responded to that call, was as follows. "3 Krors from the Añjana Hills; 10 krors from the Astāchala regions, 1000 krors from the Kaitasa hills, 1000,000 (one Padma) from Himilayan regions; 1000 krors from the Vindhya hills; Vānaras without number came from the Katoda Sea, many more came from vanous forests, caves and rivers' (IV 37-20-26). The total in this case comes roughly to I million, 2 thousand and 13.

When the armies under various Vanara chiefs actually armied at Kişkindha the muster-roll was as follows

"Sata-Vali supplied 1 kror and 10 thousand, Tara's father man; krors and thousands, Ruma's father 1000 krors,

hesari many thousands, Gavakea 1000 krors, Dhumra 2000 krors , Panasa 3 krors , Nila 10 krors, Gavaya 5 krors , Darmukha 1000 krors, Mainda and Dinida thousands of krors Gasa 3 krors, Jambasan 10 krors, Rumansan 100 krors, Gandha Madana hundreds of thousands of krors, Angada 1000 Padmas and 100 Sankhas, Tara 5 krors. Hanuman 1000 krors, Nala 100 krors and hundreds of thousands. Darimukha 10 krors in addition to the huge armies brought by Sarava, Kumuda, Vahni, Rambha and others' (IV. 39 12 37) Expressed in terms of the English system of notation the figures would come to billions and trillions It would be interesting to compare the huge figure given above with the estimate of the Vanara army as given to Ravana by Sarana "Nila surrounded by hundreds of thousands of Vanara chiefs. Auguda at the head of a huge army, Nala surrounded by another bur army, a huge army consisting of the Vanarus of the Sandal forests led by Samrochana a big army under Kumuda, Rambha with an army composed of the Vanaras residing on the Vindhya, the Arsas and the Sahya hills Sarais from the Salveya halls at the head of an army composed of 30 krors. Vihara army consisting of 41 lacs from the Pariyatra hills, under Panasa an army of 50 lacs, another army of 60 lacs under Vinata, 70 lacs under Gayaya' (VI 26 11 46) Alongside with this should be rend the following which is only in continuation of the above extract . "Krathana stands there surrounded by an army of 1000 krores of Vanaras, 1000 lacs with Pramathi Gavikea, with the Golangula army of 100,00,000 Vanaras, Gaja, Gavakta, Gavaya, Nala and Nila each attended by 10 krors (VI 27 23 47) Then if we care to compare Sarana's estimate with the one given by Suka to Ravana, the number is simply bowildering! For says he

एपां केटिसहस्राणि नव पञ्च च सप्त च । तथा शकुसहस्राणि तथा कुन्दशतानि च ॥ एते सुग्रीवसचित्राः किप्तिन्यानिलया सदा । हरया वेवगन्धर्वस्तवाः कामुरुपिणः॥

(VI 28 4 5)

These Vanaras, numbering 100 Vrndas, 1000 Sankus and 21000 krors, born of the Denas and the Gandharvas and assuming various forms at will, are the immediate companions of Sugriva hailin, from Krkindhi

And when we take into consideration the fact that यस फर्ग यस किञ्चित्तर्त्रे नेपायबताम्। यतस्य छत्य घेर ने विक्रमेश प्रयुक्त ।म् ॥ (VI 4 13) only able bodied persons were allowed to jour the distant bound expeditions, we admit that the number simply staggers our imagination And when we come to include the old and the decrepit, the young ones and the she vanaras, who were left behind the number goes up still higher So after making due deductions from the poetic exaggeration indulged in by our poet, we cannot but admit that at that time is liadla must have been one of the most thickly populated parts of the world. And is it not probable that it was the numerical strength of the Vanaras alone that led the banished, the helpless Rāma to seek for their help in times of distress?

Their past history—It is a well known fact that the present is the child of the past and that a nation without history is deemed. For it has nothing behind it to look back upon and to gather inspiration from. A nation without a past has no future before. If it be true of all nations, then it is true of the Vanaras too for they claimed to be a nation. The Vanaras, it must be told had a glorious past to look back upon and to draw inspiration from, for a still more brilliant future was assumely waiting for them. We are told—

चानराणां प्रभावे।ऽयं न केन चिदितः पुरा । देवतानां सकाश च वे गच्छन्ति निमन्त्रिताः ॥

Who is not aware of the influence exerted by the Vanaras in olden times, as they used to go to the Devis on invitation?

Then with reward to Limby in the Sames to Rivers

Then with regard to Jambavan, says Sarana to Ravana— यतेन सारां तु महत्कृतं शकस्य घीमता ।

देवासुरे जाम्यवता लन्धाश्च वहवा वरा ॥

(VI 27 12).

that he obtained numerous boons from Indra from rendering a Joeman's service to him during the Deva Asura wars Again, with regard to Sannadana we are told—

येन युडं तदा दत्तं रखे शत्रस्य घोमता । पराजयध्य न प्राप्त. सीऽय यूथपयृथपः॥

that he kept up an even fight with Indra Then with regard to Hanumin we are told how the newly both babe flew across 3000 Yojanas in an attempt to devour the using Sun (VI 28 10 15). Again with reference to Vulin we are told that his admirers mourned bittedly remembering how after fighting for full fifteen years he did to death Golabha—the Gandharva Chief (IV. 22, 27 29) 1 Tax weeps remembering

या दत्ता देवराजैन तम तुष्टेन संयुगे । शावकीम्भी प्रियां मालां तां ते पश्यामि नेह किम् ॥

क्म्॥ (V 23 2S)

how formerly being pleased with his skill in fighting, Indraawarded a golden garland to him !

Then how Valm killed the Asura Mājani, the son of Dundubhi in the depths of a dark care after lighting with him for a year (IV 9 1 22), and how he killed the buffalo shaped Dānava, Dundubhi who had challenged the Samudra and the Himanan to fight a duel with him (IV, 11-7 47), is known to every student of history Lastly, how completely the king of the Vanaras outwitted the chief of

the Rakanas is known to every body (VII. 34, 11-34)
Then Jambavan, while persuading Hanaman to take the leaf
across the sea, describes his own achievements in by-gond
days. Says he

विविक्तमे मया तान सरीलवनधानना । विःसतहत्वः पृथिवी परिकान्ता प्रदक्षिणम् ॥ तदा चै।पध्ये।ऽस्माभिः संचिता देवशासनात् । निर्मय्यममृतं याभिस्नदानीं ना महद्वलम् ॥

(IV. 66. 32-33).

When Vising was born as Vāmana, at that time I walked round this earth clad in hills and forests full 21 times, and being commanded by the Devas we gathered the medicinal

herbs which being cast into the ocean and then churned, produced nector.

It may not be out of place to mention here that it was this same Jambavān whose daughter Jambavati was sought in marriage by Sri Krsna at a future date (Visnu Purāņa IV. 13. 31).

It was the brilliant achievement of the Vānaras such as these that had made their past glorious, and taking courage from these examples, the Vānaras of Rāma's age sought to make their future still brighter! And it is about the life of these Vānaras that we are going to speak to-day,

Social organisation—Regarding the organisation of the Vanara-society, Valmiki says

ते प्रधानेषु यूपेषु हरीकां हरियूचपाः ।
वस्तुर्युपपश्चेष्ठान्तिरां ।
वस्तुर्युपपश्चेष्ठान्तिरां ।
वस्तुर्याः स्वत्याः स्वत्याः सहस्रगः ।
वस्त्याः स्वत्याः सहस्रगः ।
वस्त्याः साम्राविद्याः सहस्रगः ।
वस्तुर्यः न साम्राविद्याः साम्राविद्याः ।
वस्तुर्यः च साम्राविद्याः ।
वस्तुर्यः च साम्राविद्याः ।
वस्त्राविद्याः ।
वस्त्राविद्याः ।
वस्त्राविद्याः ।

(1. 17.30- 33)

These, foremost of the Vanaras, became the chiefs of different class These in their turn produced more Vinaras Some retired to the sides of the Rksavan hills by thousands, while others took refuge in various hills and forests Rat all Vacaras owed allegiance to Valin, the son of Indra or to Sugriva, the son of the Sun god, either directly, or indirectly through such chiefs as Nala, Nila or Hanuman It may be pointed out here with advantage that the ancient Vanara society resembled the ancient German Society in this respect. and our readers need not be told that here lay the seed of the Feudal system of the later age. In the Father-land, each and every German was bound to his lord so far as his person was concerned. He was obliged to work for him in times of peace in the home land, and follow him or fight for him in times of war in distant countries. This aspect of Feudulism is called by the historians the personal element Later on, when land became plentiful, it at once became th tie that bound the vassal to the person of his lord. Even then the personal element was present there

Now, these Vanaras were divided into three classes, i.i., the Risas, the Vinaras and the Golangulus (1 17 19) It would have been interesting if we could have giver a description of the personal appearance of the members of each of these three classes. But we regret to observe that our poet is almost silent on this point. Still a few words on this point may not be uninteresting.

The poet uses the word AA at several places but never these to give a development of the personal appearance of these But with reference to Jambanan he uses the significant epithet AA are a discount of the AA are that the AAA were not bears, but that they were a cliss of Vinans who used the figure of a bear as their totem like the No th American Inlians and the Australian Savages.

In this connection it should be noted that the word

RR is never used as a synonym for the word bear in the

Sanskrit Linguage but as the use is rather singular, I am

afraid, I cannot speak with sufficient force

With regard to the Golāńgūlas, Sarana describes them in these words— $\,$

सितमुखा घेारा गेालांगुला महायताः ।

(VI 27 32)

the black faced, the terrible and the powerful Golangulas With regard to the Vanaras it must be observed that they were of various colours (IV 37 20 26)

Footl and drink—The favourite sons of nature as these Vanaris were they lived on the raw products of nature, such as fruits and roots Though aware of the use of fire (IV 5 12 16), it seems that the art of cooking had not made any progress in the Vanara society Says Valin to Rāma,—

फलमूलाशन नित्य वानर वनगोचरम्॥

(IV 17 25)

We Vanaras are foresters by nature and live on fruits and roots Again

चय वनचरा राम सृगा मृलफलाशिन । एपा प्रहातिरस्माक पुरुषस्य नरेश्वर ॥ भूमिहिंरएय रूप च निवहे कारणानि च । तव कस्ते यने लोभा मदीयेषु फलेषु या ॥

(IV 19 30 31)

O Lord of men you are the perfect Being while we foresters naturally live on roots and fruits. Land gold and beauty are the perennial sources of quarrel, while our forests or their yields can hardly provoke you to open hostilities with us.

Then of the Vanaras who in response to Sugriva's crders, came from the Himalayan regions, they, we are told, फलसूलेंग जीवरत: (IV. 37-23) lived on fruits and roots gnd of those that came from the coast of the Kitroda Sea, we are told that they lived on coccoanuts (नारिकेलायना:, IV. 7.25).

Again of the expeditionary force that went to the South to fight with the R4ksasas, we are told that they marched,

भक्तयन्तः सुगन्धीनि मधुनि च फलानि च । उद्यहन्ते। महावृत्तान् मखरीपुक्षधारिष ॥ (IV. 4.7)

subsisting on fruits and drinking the sweet-smelling Madhu (honey-wine) and carrying huge trees bedecked with clusters of stalks laden with fruits and flowers

At the out-set, it must be told that the Vanaras were not the members of the Temperance Society and that they in accordance with the custom of the day very often used to take to drinking

On the approach of the autumn, Rima is justly angry with Sugriva, for steeped in wine and women, he failed to locate the whereabouts of Sitä (IV 30 79) While Laksmana was passing through Kişkindhā, the atmosphere of thestreets was laden with the smell of maireya and madbu (IV 33 7) Sugriva asks Hanuman to send for the Vinaras of the Mahāruna hilis who were hard drinkers of the maireya and madhu (IV 37. 7)

The intotacting effect of madhu on the Vanaras is a pleasant reading. After discovering Sitä in Lankä, Angada's followers broke into the Madhurana, the preserved forest of Sugriva, and there they drask hard and then began to dance and firsk about, and sing and laugh and weep, recite aloud, and leap about (V. 61 14-19). Then we are told that in this state they picked a quarrel with the guards and

roughly handled Dadhimukha, the officer in charge and his men (V 62 9 34)

Again, when the expeditionary force reached the Sahya hills, we are told that the Vanaras, as the result of another hard drink, pulled down the branches of the trees, uprooted creepers, roared aloud from the tops of trees and jumped from tree to tree (VI 4 88 91) Among the Vanaras probably the practice was universal Men as well as women, every body kissed the cup. We are told that Tara, when she came out at the desire of Sugriva to receive Laksmana on his behalf, did not feel shy as she was in a drunken state (IV 33 40).

Dress—The Vanaras it must be noted, were the in habitants of a tropical country. So their dress suited the climatic conditions of the land in which they lived. Yet it displayed their aesthetic sense as well as their power of the purse.

Sugriva complained bitterly of the conduct of Valin when he said to his patron Rama that-

एवमुक्त्वा तु मा तत्र वस्त्रेणेकेन वानर । तदा निर्वासयामास वाली विगतसाध्यस ॥

(IV 10 26)

he was banished by his powerful brother without a second cloth! On the occasion of the encounter between the Vanars princes—Valin and Sugriva we are told that—

सुत्रीवेऽप्यनदृद्धोर वातिवे द्वानकारसात्। गाढ् परिहितो वेगात्रादेन्निन्द्त्रिवास्यरम्॥

(IV 12 15)

Sugriva winding his cloth round the loin tightly bellowed the challenge to Value tearing open the sky

Again immediately before the final encounter Valin finding Sugriva ready for it बाढ परिवध वासी घाली परम-धेरपन (IV 16 16) tightly wound the cloth round his waist On the completion of the crematin ceremony of Valm, we are told that

ततः श्रोफाभिसततं सुप्रीय क्लिनवाससम् । शासामृगमहामानाः परिवार्थोपतस्थिरे ॥

(IV 26 1)

the high Vanara officials squatted round the grief stricken Sugriva who was then wearing wet clothes

When Sita for the first time saw Handman in Lauks, she found him diving a value cloth (V 32 1) Lastly on the occasion of Ramas coronation ceremony Sita was presented with two pieces of cloth, white like the moons rays and some brautiful ornament by Rama It is said that she transferred these articles to Handman, besides a necklace which she too, out from her own person (VI 128 78 79) When Tata at the desire of Sugriva went out to placate the wrathful Laksmans on behalf of her Lord it is said that

सा प्रस्पलन्ती मद्विह्लाची प्रलम्बकाञ्ची गुण्हेमस्या । सल्रक्षा लदमणस्तिधान जगाम तारा नमितागयष्टि ॥

(IV 33 38)

the auspicious Tara with her person slightly bent down, approached Lahsmana with her steps unsteady and eyes rolling about, wearing a noble girdle string round her zone and a long gold string dangling from her neck.

Again, on entering the harem of Sugriva, Laksmann is said to have found if well supplied with noble looking girls possessed of beauty and youth well attired and richly decorated with ornaments engaged in preparing garlands (IV 33 22 23)

At the desire of Rima and Sita the Vanara ladies of Sugriva's barem dressed their persons lavishly before starting for lyothya in the aerial car (VI 123 36)

Enough has been sail above to show (I) that the Vanaras of the Trett Age did not go about sky clad like their present descendants (II) that both males and females probably used two pieces of cloths—the upper cloth and the loin cloth—like the r Aryaa Contemporaries,

(III) that they did not use sews garments prepared by the tailor

It would be interesting here to compare the dress used by the Vanaras in the Para Kalpa. The Padma Porana (Patala Khanda) gives a resume of the Rimiyana as it was known in the Pura Kalpa There we are told that the Vanaras were gold coloured in appearance that they used ear-rings the sacrificial thread and that they were a short piece of cloth over the privities-aldia, made of Maunii grass (Padma II 71 155) But just at present we are speakig of the Vanaras of the Treta Age of the Varaha Kalpa And it is just possible that in that age-though not universally, as is laid down in the Visnu Purana that शरीरवाणकामा व सोपानतक सदा प्रजेत् (III 12 38) those wishing to keep well should always walk with leathern shoes on -the Vanaras of the higher ranks at least actually used shoes. We find that on the occasion of Sugriva's coronation ceremony he was supplied with a pair of leathern shoes (IV 26-27)

And these Vinaras used ornaments made of gold and precious stones too. We are told that Valin before going out to fight with Dundubhi put on the necklace of gold (काश्चन माला) given him by Indra (IV 11 39) Indeed our poet at one place describes the Lord of the Vanaras as हेमसाहिन्द, (IV 11 61) This precious necklace of Valin, we are told, was "made of gold and set with dismovids (IV 175) Of Sugriva we are told that which behalf day at Rimas

eet with great affection, his ornaments hung down (from its neck) (IV 12 6) Indeed Rama in the course of the valuantion given by him to Sugriva as to why he did not ill Valin during the first encounter says

श्रलकारेण वेपेण प्रमाणेन गतेन च। त्य च सुग्रीय धाली च सहशो स्य परस्परम्॥

(IV 12 30)

hat the similarity between the two brothers was so very exact in the matter of ornaments, dress and motion, that he ould not distinguish the one from the other

Angada, the crown prince, has several times been des nibed as ভ্ৰমন্ত্ৰান্ত, wearing a pair of gold bracelets on the ipper arm (IV 18 00) Later on we are assured that Valm, on had these ornaments on (IV 20 24) Then it has liready been pointed out above how Sita on the occasion of Rima's coronation ceremony gave a precious necklace to Hanaman (VI 128 77 78)

As in ancient India both males and females used the same ornaments to decorate their various limbs we can safely conclude that the she Vanaras too used the various orna nents noted above and represented to have been worn by the males. Only two ornaments remain to be noted here that have been used with reference to she Vararas only, and these are que and with reference to she Vararas only, and

When Laksmana entered the harem of Sugriva, we are told (IV 3 25) that the noble looking son of Sumitra abashed on hearing the sound produced by the agg (anklets) and valual ignule string) used by the immates of the harem

In connection with the same topic we are assured by the port that these girls were liberally provided with beautiful omaments (भूगलाजमम्बद्धा IV 33 23) And it has already been noted above that when Tara appeared before Laksmana, she was wearing a girdle string and a chain of gold (IV 33 38)

The Venatas were great lovers of scents and flowers While Laksmane was passing through the streets of Kishindha, he found the atmosphere surcharged with the sweet scent of the aguru sandal and lotus flowers (IV 33 7)

Again Laksmana found Sugriva

दिव्याभरणचित्रांग दिव्यरूपं यशस्विनम् । दिव्यमारयाम्बरधर महेन्द्रमिव दुर्जयम् ॥

दिव्याभरणमालाभि समन्ततः। (IV 33 64 65)

the glorious one, (seated) in the midst of his heavenly beauty, his limbs profusely decorated with ornaments and ontments, and surrounded by girls furnished with divine ornaments and unfinding garlands.

And before speaking to Lalsmann, Sugriva is said to have torn away

ततः करहगतं मार्य चित्र बहुगुरा मद्दत् (IV 36 3)

the grand, multi-coloured and mentoricus garland round hisneck

Manners and customs—Under this section I would quote instances to show that the Vanaras like all other civilised peoples of the world had a recognised code of etiquette to guide them in the society and that they were a civil and polite people

Unlike the savages the Vanams could distinguish the right from the wrong and if they happened to offend any body, then instead of fighting with him for the purpose of upholding the wrong cause, they were tends to ask for a problem. And how this was done is interesting to note. On the demac of Valin, the inimates of his limited led by Thrawit saying.

यद्यप्रियं किंचिदसंत्रधार्यं कृतं मया स्यात्तव दीर्घवाहे। । समस्य मे तद्धरियंशनाथ वजामि मृद्यां तव वीर पादो ॥

(IV. 20, 25),

Long armed Lord of the Vanara-race, if we have offended you in any way on an unguarded moment, then placing our heads at your feet we ask for a pardon

And this is exactly what we do if we happen to offend a superior person!

Then in the matter of according a bearty reception to an ionoured guest, these Vanaras yielded place to none. We ire told of Sugriva that as soon as Laksmana appeared in light,

उत्पपात हरिश्रेष्ठी हित्वा सै।वर्णमासनम् । महान्महेन्द्रस्य यथा खल्छत इव घ्यजः ॥ उत्पतत्त्रसन्त्रोत् इभाप्रभृतय स्त्रियः । सुग्रीवं गगने पृष्टै चन्द्रं तारागणा इव ॥ (IV 34 3—4)

Sugria, the best of the Vānaras, was up on his legs, leaving the sent of gold, like the richly decorated barner consecrated to Indra, and he was followed by Rumā and other she-Vānaras even like the stars that follow the full

Again when Sugrita went to see Rama for the first time after his coronation, it is said that on arriving at the spot where Rama was waiting, he along with Lasimana left the conveyance in which they were being carried, then appearing before Rama, he folded his hands together and his action was imitated by all the Vinaria present there. Rima too, on finding the ford of the Vanaria humbly Jing at his feet, raised him gently, embraced him affectionately and then asked him to take a seat (IV 38 15—19).

moon

When iHanamān returned from Lankā after tracing the whereabouts of Sitā, he was affectionately received by his grateful companions. On that occasion, it is said, finding Hanumān dropping down from the sky, his companions waited with folded hands, and when he landed on the summit of that hill, all stood round him with beaming faces, some presented him with fruits and roots, some chattered aloud, while others ran for fetching branches of trees to sit on. Hanamān then saluted the aged ones, such as Jāmbavān and others and the crown-prince Angada. Then having been honoured by them, he communicated the success of his mission in a few, well-chosen words (V. 57. 28—36).

These Vānatas also knew the art of introducing themselves to unknown persons and leaving a lasting impression on their minds. When Hanaman in the guise of a Bhiksu (wanderer) approached Rāma for the first time, he began with humble salutations and profuse panegyries (IV.3.3—4). In this way he was successful in rousing the confidence of Rāma. Again how Hanaman was able to rouse the confidence of the much-persecuted Sitā, through his winning manners and guarded speech (V. 33—1ff), is known to everyone.

They also had the necessary training as to how best to conduct themselves in the presence of the superiors. Sugriva while sending the Vanaras to every quarter of the globe in search of Sua, first of all dismissed most of his Vanara chiefs, then humbly approaching his father-in-law Suseva, the liather of Tara, he humbly bowed down at his feet and with folded hands proposed to send him to the West at the head of a search-party (IV. 42. 1—6). Again in reply to the encomum bestowed on him by the old veteran Jambavan (VI 74 21—23) when Rama and Lakymaoa had been mortally wounded by Indmit, Handman is said to have

humbly approached him, and then howed down to him repeating his name (VI—74—24). Again, while Rāma gave Hanhiman his signet ring in order that he might have a free access to Sitā, Hanhimān taking it from Rāma, is said to have first of all put it on his hand, then with folded hands saluted him, touched his feet and departed (IV—44—15). Similarly, when Sitā gave him her crestjewel for favor of carrying it to Rāma, on that occasion too Hanhimān having taken it from her, is said to have saluted her and then walking reverectially round her bowed down to her once more and then stood aside (V 38—68)

Indeed the custom of giving presents and accepting them was well advanced in the Vanara—society. We are told, for instance, that the me sengers despatched by Sugriva to convey the general mobilisation order, intentionally broke their journey on the Himālajas to gather the heavenly fruits and roots and medicinal herbs from the sacrificial grounds of Siva to win the favor of their king (IV 37 31—32). Again, on the eve of Sugriva's coronation, Handimān is said to have approached Rāma and peisuaded him on behalf of his master to pay a visit to the town so that his liege lord might get an opportunity to return thanks by making rich presents to him (IV—26—7)

These Vanaras also knew how to swear eternal friendship solemally in the presence of the burning fire. We are told how in accordance with the advice of Kavandha (1II 72—17—18) Rāma was desirous of entering into an alliance with Sugriva. The scene is worth describing in full. Hence this attempt. "After Handman had formally introduced Rāma and Laksmana to Sugriva, the latter stretched forth his arm and asked Rāma to hold it in his own fibe was inclined to make friendship with a Vinara like him. Pursuant to his wishes Rāma pre-sed the offered hand in his own

and then embraced him affectionately. Hanuman in the mean time had produced a fire by rubbing two pieces of wood together. Then having worshipped it duly, he placed it between the two. Lastly Rāma and Sugriva walked round it solemnly. Thus the two entered that day into a life long alliance, which death alone could separate? (IV 5 8—6) Sugriva was justly proud of this fact, as he alliades to this later on

त्व हि पाणित्रदानेन वयस्या मे ऽग्निसान्तिकम् । (IV--8--27)

Thou art my sworn friend, who hast offered his hand in eternal friendship. In this connection it should be noted that Rivana too after his discomfiture in the hands of Vilin is said to have sworn eternal friendship to his victor in the presence of the fire (VII—34—42)

The rites and ceremonies connected with the coronation ceremony of Sugriva deserve to be quoted in full, we are told that "the partisans of Sugriva collected the articles required for the ceremony, viz a white umbrella, worked in gold, a pair of fly whisks furnished with rods of gold, various kinds of precious stones, seeds, medicinal herbs, the tender shoots and flowers of trees yielding milk, white clothes, white unguent (असुलेपन), seents, wreaths, hiles and lotuses, sandal-paste, various kinds of scents, fried grains (अस्तिम्), gold, निम्पा seeds hones, clarified butter, curd, tiger skin, and a pair of costly shoes

"The ceremony actually commenced with the appearance of sixteen maidens who held in their hands such auspicious articles as the मन गिला (Red Arsenic—Wilson) and गोराचना (a bright yellov pigment found in the heal of a cow, or prepared from the urine of the animal ibid) Then having propitiated the noble Brahmaras with gifts of precious stones.

clothes and food, they proceeded to instal the best of the Vanaras on the throne. Next, Brahmanas well-versed in the Mantra-lore offered oblations to the burning fire in accordance with the prescribed rites. This was followed by the pouring of scented water brought from various holy rivers and seas in gold pitchers and belliborns by the various Vanara-chiefs on the head of Sugriva who was seated (on a seat of gold, covered with a beautiful cover), facing the east at the top of the palace that had been profusely decorated for the occasion". And we are assured by the poet that the whole ceremony was conducted on the lines recommended by the Sastras and the foremost of the soges (IV. 26. 22—36).

In this connection I should like to tell the readers how the Vanaras disposed of their dead. Fortunately Välmiki has given a faithful description of the rites and ceremonies connected with the cremation of Välin and we can only quote it in extense to satisfy our curious readers. We are told that Lakimana asked Sugriva to employ the Vänaras in collecting a large quantity of dry wood and sandal-wood too, and to request the crown-Prince to fetch garlands, different kinds of cloths, clarified butter, oil and scents. Then he asked Tärä to get a conveyance (शिश्वा) and to ask the bearers to get ready.

(IV 25 12-19)

"On the arrival of the richly decorated and well furnished conveyance Sugriva and Angada placed the corpse of Valin, gorgeously attired, garlanded and duly ornamented, in it. In accordance with the instructions of Sugriva the bier was carried to the river-side preceded by the Vanaras who scattered precious stones of different kinds and followed by Tara and other wives of the dead chief weeping bitterly.

"Then a large number of Vānaras constructed the funeral pyre on the solitary bank of a hill stream, lashed by water " meanwhile the besrers placing the bier on the ground waited at a lanely spot with a heavy heart (IV 25 37-39)

"Shortly afterwards Augada and Sugriva with an aching heart laid the corpse on the pyre. Angada at last set fire to it and walked round the burning pyre according to the prescribed rites. Then all the Vanaras headed by Angada, Tara and Sugriva walked into the river to offer water in memory of the departed soul under the guidance of Rama. (IV 25 49 53)

Town and Town life—India from the very dawn of her history has been an agricultural country. This circumstance has forced her sons to live in small sized scattered villages and hamlets. If this has been true of her human children, it applied with double force in the case of her Vanara children. These Vanaras, as has already been told, mainly dwelt on the summits of hills and in jurgles. But when we speak of the Vanaras organised politically, of a Vanara kingdom, it at once reminds us of the Vanara Capital for in Ancient India every little blessed kingdom had a capital of its own. Its size, its importance or its population, and not matter much Yet it was the Capital where the king with his little court resulted.

This kiskindhā was the little capital of the mighty Vanara kingdom. The poet is very liberal in the use of high sounding epithets to describe this town. For instance, he calls it resplendent without a match signeral (IV 11 21), protected by the valour of Valin (IV 13 1) nursed by the provess of the son of Indra (IV 13 30) beauteous (IV 25 19) unassailable (SCHQTT IV 13 29), unattainable (SCHQT IV 31 25) and so on Besides impressing his teaders with its dignity and might, the poet also gives

us some information regarding its position, defence and beauty. More than once he calls it a little town (IV. 16 13). Then he tells us that it was situated in cave (I. 1 67, IV. 26 41) near the Prasravana hills (IV 27. 26). This town, as was customary in Aucent India, was provided with the city gates (IV. 9 5, IV. 11 26 27) and surrounded by walls and moats (IV 31 27). It was defended by forts (IV 19 15), bristing with a net work of Vanaras, decorated with gold and studded with banners and machines (IV. 14. 5 6)—a great city difficult of access and full of armses (IV 31 16). Again, while introducing Sugria to Ravana Suka describes Kiskindhā in the following words. Accompanied by his chieftinis, he dwells in the fort of Kiskindhā, clad in dense forests and the most inaccessible of all hill forts.

गण्ड महत्त्वनादद्त किण्डिया नाम वै शुभाम् । सा सार्य गुलस्यता महता च पुरा शुभा ॥ तव बात्तरपुषानि सुब्हानि श्रवान्त च । बहुत्तरसभाकीर्वा सार्वर कामस्विधिमः ॥ पुराण पुरावती हुर्गा चार्त्वर्वर्षपुरस्कृता । विश्वकर्षकृता दिव्या मन्त्रियागण्च योभना ॥

(VII 37 (A) 47-49),

Messenger, you take (Rica-Rajs) to the heautiful town named Ki-kindha. It is extensive, mentorious and it would be the source of his prospently because it is the habitat of numerous Vanaras. Visva Karman constructed that beautiful, holy and divine town at my desire. It is innocessible, full of articles of merchandise, abounding in costly jewels, the home of all the four Vanaras well as of the Vanaras.

[•] In this connection the testimony of Brahman is worth considering Says he-

Yet the defence-works mentioned above did not mar i beauty, for we are told that it was well provided wil gardens (IV. 27—25), abounding in gems, heavenly, adorn with flowering gardens and beautiful (IV. 33—4), full charming palaces and mansions, decorated with various protous stones and embellished with all sorts of flowering tret that produced fruits whenever wished for (IV. 33—5), are crowded with Vanaras decently clad and wearing unfadin garlands, who could assume various forms at will (IV 33—6)

Such then was Kışkındha, the mighty little Capital of mighter nation, and as for the life that vibrated therein w cannot do better than quote in full as it appeared to Laksmana while he was going to the Palace passing through the streets for demanding an explanation from Sugriva for his dilatoriness "On receiving the formal permission of Sugrica, Laksmana at the desire of Rama entered Kiskindha situated in the midst of a case At his sight the guards at the gateway waited quietly with folded hands. But finding him in a distemper, they dared not follow him Laksmana on entering that spacious cave found it studded with precious stones, well provided with flower-gardens, thickly beset with closely built palaces and mansions, decorated with all sorts of sewels, embellished with all sorts of desire yielding trees. crowded with Vanaras, the children of the Devas and the Gandharvas-all decently clad and wearing divine garlands, assuming various forms at will, and noble looking, -and the atmosphere of the streets was laden with the sweet smell of Madbu

"He ther passes by the beautifully white mansions belonging to the various Vanara chiefs, resplendent like the clouds, adomed with sweet-smelling parlands, abounding in wealth and grains and liberally supplied with beautiful women Shortly afterwards he found himself standing before the palice of Sugrius surrounded by a white wall built of crystal stones looking like Indra's palace white capped like the summit of the kailista hills thickly planted with the desire yielding flovering fruit giving shady kalpa tres, that came as a p esent from Indra and charming like the niky cloud pregnant with water closely watched by strong Vanaras carrying weapons addread with unfading garlands and having a porch made of molten gold

'Lak maga next entered unrestricted into the hirem of the Vanari prince even like the noon day sun darting through the thick layers of clouds. He found it handsomely furnished with bedsteads and comfurtable seats made of gold and silver. There he heard the strains of melodious music, both vocal and instrumental rich in keeping time wording and ornamentation. He also came across numerous girls there possessed of vouth and beauty nobly descended and well supplied with minents and ornaments engaged in manu facturing garlands also he saw there some of the attendants of Sugriva who appeared contented ever ready to carry out orders and moderately provided with ornaments. (IV 33.1.24) Such was the life that the Vanaras led in their Capital

Monits —If right conduct has the public weal for its ultimate object then the best synonum that I could suggest for the English term morals would be बदाचार। For बदाचार has also the same object in view (Manu II 5) Now this सदाचार has been defined as follows

> साधवः होएदायास्तु सच्दृब्द साधुयावकः । तेपामाचरणः यसु सदावारः स उच्यते ॥

> > (Visno Purana III 11-3)

The term দ্বন্ stands for good men, and only such men are called good as are faultless. The conduct pursued by such men is called দ্বাবাৰ।

In this connect on it would be interesting to note the authorities whose conduct was considered right by the Ancient Arvas Says the same Purana—

सप्तर्पवाऽथ मनवः प्रजाना पतयस्तया । सदाचारस्य वकार कर्चारक्षा महीपते ॥

(Ibid, III 11

O King, the seven Rsis, the Manus and the Prayipi enunciate I and practised the code of Right Conduct

The only remark that I should like to make here is the that these sages laid down the code of Right conduct for advancing the common weal of the Aryan population of India They were not competent enough to be followed by all the tribes and nations that lived in India at that time, for the standard of morality has varied from people to people and tribe to tribe For what is sauce for the gander, has never been the sauce for the goose! In spite of this fact if the Arvan standard of morality came to be adopted in Ind a generally, it goes to prove the mighty move taken by Aryan Imperialism in bye gone days But whatever differences there may be in details the moral standard of each and every people aims at securing the common weal for all its members Expressed in other words it would mean that the moral standard adopted by certain people is the result of long standing custom, it has the sanction of ages behind Therefore however disgusting may the morals of a certain people appear to be at first sight to an outsider, it must be remembered that these have a tradition behind them and as such they ought to be respected Did Procustus' bed fit anybody and every body that happened to be on it?

The moral history of mankind begins with a promiscuous relation between man and woman. There was a time in the history of every old world nation when man was the slive of his instinct, and in the matter of sevual relation with woman, he played the animal. But after some time, probably with a view to establish the common weal by making an end of petty jealousies and bickerings for the sake of woman, man reduced her to serfdom to curry out his whims and fancies by tying her to his person in an artificial bond that goes by the name of martiage. Still nature had her way and man was not satisfied with one woman. This consideration combined with economic pressure gave rise to the system of polygamy. What is true of all nations is true of India too Says the Skanda Puraga—

'Formerly women indulged in promiscuity. But for the purity of the rising generation. Vrhaspati transferred a fourth part of Indra's sin to them, thus checking promiscuity (1 16 41).

The case of Jäbili (Chhāndogya IV 4 1 4) is so well known that it needs no repetition here

Then how the great sage Swataketu came to establish the institution of marriage in the Aryan society in India is vividly descriped in the Mahabharata (1-128-12)

I am stroughy inclined to suspect that the Ramijana speaks of that particular period of Vanara history when in their society at least promiscinty reigned supreme when the idea of respecting female chastity had made little head way. Yet their society was not matriarchal and there was extant the institution of formal marriage among them

The originator of the Vanara Royal House was Richard His origin as well as those of Valin and Sugarva are all shrouded in mysters. It is said that born of a drop of tear

tnat trickieu down the cheek of Brahma, Rhsarāt was deputed to rule over the Vanaras in Kiskindha After some time he is said to have plunged into a lake to fight with an imaginary foe But lo! when he came out of water, he remained no longer a male being, instead he had been translated into an attractive girl. Fortunately there were passing by that way our gallant. Index and the all powerful Sun Finding that beautiful girl in such a lonely spot, naturally they grew passionate and as the girl did not yield to their embraces easily, the poor souls deposited their semen, one on her head and the other on her neck. Thus were born Valin and Sugriva from Indra and the Sun respectively (VII-37-A 8ff) Now, this event of a man being changed into a woman is by no means singular. We are at once reminded of the peculiar case of Raja Sudyumna who having offended Pirvati by trespassing into her garden, was at once changel into a woman named lit. But by favour of Siva he was again turned into a man Later on he used to become a man and a soman alternately for a month (Su a Puring, I 62 13 ff) Similar was the case of the Brahmann youth Soma Vana, who disguised is a woman is said to have cheated the Queen Simantial at the desire of the Raix of Vidarbha Therefore he toq was changed into a woman for good (Skanda III (c) 9 2 ff)

f Vālin (IV-46-3-9) Then when Vālin suspecting foul day on the part of his brother exiled him, in retaliation lain is said to have paid him in his own coin by apprepriating duma, the wife of Sugnia And the wretched Sugriya omplains to Rama in these words

> श्राप्यमुकं गिरिवरं भार्याहरसद खित । प्रविष्टोऽस्मि इरावर्षं वासिन कारणान्तरे ॥

(IV-10-28)

Being grieved at the forcible appropriation of my wife. I have taken refuge in the Rayamuka hills, because these regions are inaccessible to him ion account of Matanga's curse)

And Rama having been supplied with the quest, admonished his fallen enemy in these words

> तदेतरकारणं पश्य यदर्थं स्वं मया इतः । भार्तवर्तसे भार्यायां त्यक्त्या धर्म नगतनम् ॥ श्रस्य त्वं धरमाणस्य सधीवस्य महात्मन । रमायां वर्तरो कामात् स्त्रपायां पापकर्मञ्जू ॥ तद्वपतीतस्य ते धर्मात्कामवृत्तस्य वानर । भारभायांभिमर्शेऽभिन्दराह्माऽयं प्रतिपादितः ॥ श्रीरसीं भगिनीं वापि भार्यः वाप्यनजस्य यः । प्रचरेत गरः कामात्तस्य दएडो वधः स्मृतः ॥

(IV-18-18 #)

Overstepping the laws laid down in the Religion Eternal. you are guilty of an incestuous sin with your brother's wife. and this was the reason that I-d me to kill you O sinner. impelled by Desire, you have violated the chastity of the wife of the high souled Sugrata who is your sounger brother. for breaking the laws laid down by the religion, this is the punishment that I am pleased to award . Death is the only punishment recommended for such sinners as violate the chastity of their natural sisters or sisters in law

We frankly confess our mability to follow the line of teasoning advanced by Räma, remembering the fact that it was his ally, Sugawa, who led the way, and the poor Valin simply followed his footsteps! Elsewhere he says that he had falled him without giving a previous netice because he was only a givenger (a monkey) (IV—18—40) Supposing that he was one, how could Räma exact the moral standard observed by human beings from a monkey?

Again on the death of Valin, Sugriva once more laid his bands on Tara, and this time permanently, nor did he forget to reclaim his own wife, Ruma On the approach of the autumn season, Hanuman found Sugriva—

स्वां च पत्नीमभिन्नेतां तारां चापि समीप्सिताम् । विहरन्तमहाराज ऋताये विगतन्वरम् ॥

enjoying the company of his beloved wife and that of the equally beloved Tara, day and night and without ennu-

Again Sugriva is said to have turned a deal ear to the reports of the Vanara guards who brought the news of Lakemana a visit to Kinkindhä Indeed Tara freely admitted the fact in the presence of Lakemana, when she said—

रामप्रसादात्कोर्स्ति च कपिराज्य च शाध्वतम् । प्राप्तवानिक्ष सुप्रीयो यमा मा च परतप ॥

(IV-35 5)

O Queller of enemies, Sugriva has earned undying glory, the kingdom of the Vantras, Rumi and myself through Rima's favour

Again, the circumstance of Handman's birth is olso an interesting reading. He was, says Jambavan, the natural son of the Wind God and the deputed (Guai) one of Kesari—a Vanara chef, born of the latter's wife Punjiyasthaia.

(IV-66-29-30). Hanuman seems to have taken a glory in the fact, for he introduced humself to Sita in these words:—

> तस्याहं हरिका सेत्रे जाते। यानेन मैथिति । हनुमानिति विस्याते। लोके स्वेनैय कर्मका ॥ (V-35-81)

I was born of the wife of Keśari and begotten by Pavana.

I am known to the world as Hasuman through my work.

The circumstances of his birth, however, were as follows —

"The renowned typsort Pufipkasthalā alias Afijanā was born as a she—Vānara on account of a curse. She was married later on to the Vānara chief Kesart One day while, assuming the form of a human being, she was walking about in a leisurely fashion on the top of a hill, the Wind-God gradually removed her wearing apparel made of silk. Then there she stood in all her glory like the Temptation incarnate. It was too much for the Wind-God, and the love sick gallant at once violated her. She made a feeble protest against this unseemly conduct of the assailant, but she was soon brought round when promised a son as saliant, intelligent and swift as the God himself. Here it should be noted that the contact is said to have been only mental and not physical. Immediately afterwards Pufipkasthali is said to have given birth to ffan infair in a lonely cave."

(IV 66 8-20)

Certainly in ancient India begetting children "by deputation" was a recognised institution. But the rules perfaining to this custom we e rather strict, lest they should run into corruption. Manu distinctly save that this system was introduced during the segn of Vera, but prosembed very soon afterwards, for it caused confusion of castes. It is for this very reason that he condemns the practice (IX-64-65) But we know that its death was slow. And the Puranes preserve numerous cases where children were actually begotten "by appointment". We know that Vasistha for the continuance of the Iksvaku line, produced the Prince Asmaka from the wife of king Kalmi-apada (Vāyu 88-177), that Vyāsa produced Dhrta rīstra, Pāodu and Vidura from the soil owied by the late king Vicitra Virja (Maisya 50-44-47). The instances may be multiplied.

But to my mind the case in hand is one of clear indiscrimination on the part of Vāyu as well as Añjank. For
who "deputed" Vāyu to produce a child on his bohalf?
Again, the severest criterion on this system seems to have
been that the 'deputed' man should approach the woman
devoid of passion, as had actually been done by the Krattriya
women—after the annihilation of the Krattriya males at the
hands of Parafurim (Skanda, V 128 20) But in the
present case we are distinctly told that

दृष्ट्रेय ग्रुभसर्वाहीं पवन काममेहितः। स तां भुजाभ्यां दीर्घाभ्यां पर्याप्यज्ञत मास्त ॥

As soon as the Wind God saw the perfect limbed one, he became love sick and embraced her with his long arms

But though promiscuous in sexual matters, these Vanaras had a keen moral sense that really rouses our admiration. While thinking of taking to starvation for having failed to trace the whereabouts of Sits, says the crown prance Angada.

भ्रातुर्ज्येष्टस्य येा नार्या जीवता महिर्पी विषाम् । धर्मेष् मातरं यस्तु स्वीकरोति जुगुप्सितः ॥ क्यं स धर्मे जानीते । The wife of the elder brother should be looked up to like one's mother, and woe be to him—who violates ner during the life time of his elder brother. Such a person cannot be credited with the knowledge of the. Dharma

Again when the Wind God had secured her person ener getically with his long arms and when the 'soul had met the soul (1707cHI), the she Vānara Anjana is said to have protested against this unseemly conduct of the all powerful God in these words

पकपत्नीवतिमद् के। नाश्चितुमिच्यति ॥ (1V 66 16)

who is it that dares violat my chastity? Again engaged in prying into the harem of Rāwana Hanāman is said to have paid a visit to the drinking house attached to the Palace. There he came across a whole bery of beautiful girls, the inmittee in Rawana sharem sle ping off the intou cation produced by the drink. Naturally they were all lying in a disorderly fashion with their clothes displaced from the proper position. At this sight Hanāmān's conscience rebels and he thinks in this strain.

परदारापरोधस्य म्युनस्य निरीक्षणम् । इद राजु ममात्वर्यं पर्मेलाय परिस्वति ॥ न दि मे परदाराणं दृष्टिर्विषययर्तिनी । स्रय स्वाप्र मया दृष्ट परदारपरिमद् ॥

The sight of the sleeping immates of an unknown persons harm woull certainly result in a loss of virtue for never have I designed to cast mit ejes of the women belonging to others. Besi les I saw here one guilty of dishonoring another persons wife. But very soon he recovered the Lalance of his mind for

कामं दृष्टा मया सर्वा चिर्वस्ता राघखरित्रयः। न तु मे मनसा किञ्चित्रैरुत्यमुपवद्यते॥ मनो हि हेतुः सर्वेवामिन्द्रियाणुं प्रवर्तने। श्रमाग्रभास्यवस्थास्य तच्य से सञ्चवस्थितम॥

(V-11-41-42)

Minutely did I see the women of Rāvana, at a time when they did not expect me, but for all that my mind is as pure as ever The mind is the agent—that moves the senses in producing good or evil conditions and that agent is well in my hand

Probably this was the reason that led the poet to call him self controlled (आसमदाम् V I 196 V-61-4) more than once

The Vānaras also knew how to be grateful In reply to the severe indictment levelled against Sugriva by the hot headed Lahsmana, Tara vindicated his character in these words

> नैवाकृतन्नः सुप्रीवे। न शडी नापि दारुणः । नैवानृतकथे। वीरो न जिल्लक्ष कपीश्वरः ॥ उपकारं कृतं वीरो नाप्ययं विसमृतः कपिः ।

This lord of the Vānaras must not be taken for an ungrateful, or a decetful, or a rude, or an untruthful or an insincere being, nor has he forgotten the good turn done him by Rāma.

They also knew how to forget that stern daughter of God-Duty, when steeped in wine and women. And we are told how Sugriva spent the whole of the rainy season in the company of women without doing anything for Rama, and it required the Herculean strength of a wrathful Laksmana to couse him from the stupor. Indeed, Tara defends his conduct in these words.

ामतन्त्रे तथ बुद्धिरस्ति तथ वै यथा मन्युवश प्रपत्तः । शकाली हि यथार्थधर्मावयेवते कामरतिर्मेद्धयः ॥ ामवृत्तं मम संविद्धष्टं फामाभियोगाच्य विमुक्तलजम् । स्य तावत्परवोरहत्तस्त्वदुद्धातरं चावरवशनाच्यम् ॥ पैया धर्मतेषोत्तिरामाः फामाञ्जामाः मतिवद्धमोहाः । ! प्रकृत्या चपलः कपिस्तु कथ न सङ्जेत सुप्रेषु राजा ॥

(IV- 33-55-57).

'ou have been angry with Sugriva finding him attached ire, for you have all along kept yourself stremuously from the Path of Desire, even when men come to lose power of discretion when steeped in pleasure,—and the sages, always engaged in asceticism and religious duties, of desire, are overpowered by sweet Forgetfulness,—why should not this Lord of the Vanaras, by mature a minded, lose himself in pleasure? Therefore, O desert of the heroes on the enemy side, it behoves you to use Sugriva who shamelessly follows the path of Desire, evoted to me through passion, even like a brother of your ni

Thus, then, were the Vanaras of old, almost divine an splaying their strength of character and mostly human on teering side

Religion—Besides giving the much sought for peace of mind, the teligion followed by a certain people goes to bind together the detached members into a homogeneous whole it comes to supply one of those ties that makes a nation of a certain people. In the case of the Vanaras we are not sure if this seeming side of the utility of Religion played an important part, but we are sure that it went to satisfy the hunger of their hearts and that it supplied the necessary strength wherewith to overcome obstacles.

At the outset it must be told that Valmiki concerned these Vānaras to have been the children of Aryan Gods. As such it was only natural for them to pour forth the arder devotion of their hearts at the feet of the gods recognised by the Aryas of old. Thus indirectly it throws some light on the religious beliefs of our forelathers in the Rāmāyanic Age.

"Before taking a leap across the sea from the Mahanda Hills, Hannman is said to have prayed to Sarya, Mahanda Pavana, the Self born One, and other beings worthy of receiv ing obeisance Then he is said to have turned to the east and bowed down to his father Vayu' (V-1 8 9)

Similarly before entering the Asoka Park, he is said to have 'prayed to the Self born One Agm, Vayu, Indra who carnes the thunder bolt Varuna who carnes the moose, the Moon, the Sun, the Asyms the Maruts, the Rsis and the Lord of all Bengs for the success of his mission.'

(V-13-62-65)

"Before stepping into the gardens, he thinks of saluting the Vasus, the Rudras, the Adityas, the Asvin twins and the Maruts (V-13-54)

Then he proceeded to salute Rama, Laksmana, Sitt, Rudra, Indra, Yama, Vayu, Candra, Agni and the Yaruts

(V-13-57)

These then were some of the detties worshipped by the Vanaras as well as the Aryas of old. But this list is certainly not exhaustive and it is just positible that there were many more who shared with the above mentioned gods the devotion and attachment of the Vanaras.

Indeed, we are amused to find these Vaneras divided into several religious sects For instance, we are told that the Vanera chief Rambha was an ardent devotee of Indra (VI 27-16), then with reference to the Vanera Lord Sata val., Suka informs Răvana that he was a Sun-worshipper (VI-27-44). Thus the seed of the cult of Bhakti was there.

Now we will proceed to describe some of the rites and ceremonies connected with their religion. It has already been noted that they believed in the efficacy of offering water in bonour of the departed souls (IV-25-52-53), and that they also gladly followed the lead of the Brahmanas whose services were in request at the time of religious ceremonies specially. We have seen how they were propitiated by Sugraya on the occasion of his coronation ceremony and how they conducted the religious rites connected therewith (IV-25-14 ff). We also know that Valin used to visit the four seas daily to perform the Sandhyā prayers and on that occasion we are told that he used to repeat the Vedic mantras (नैगमान्मन्यान) (VII-34-16 18). Again before Valin went to have the final encounter with his brother Sugriva, Tara, we know, dismissed him after formally walking round him and performing the auspicious rites (known as the स्वस्त्ययन) in accordance with the prescribed form (IV-16-11-12). Similarly, before Hanuman took a leap across the sea, the venerable lambavan is said to have encouraged him in these words: "In conformity with the opinion expressed by the Vanara Nestors and by favour of the Rsis, we will all perform the auspicious rites for the success of your mission. Take leap across the sea and we will wait for you on one leg anxiously looking for your return" (IV 67 33-34)

Then, the search party sent to the south under the lead of Angada failing to discover the whereabouts of Stiz, for fear of lo-ing their lives if they returned unsuccessful to Krikindhā, determined to lay down their lives by taking to starvation (मिराप्येगम्). On that occasion taking leave of one another, each squasted on the sea-coasi, on a seat

made of the Kusa grass, the ends of which pointed to the couth, with his face turned to the east and having touched water ceremonially (IV-55-20)

The readers' attention here: drawn to the fact that Rama, too, did exactly the same thing to propitiate the Sea-God before he crossed over to Lasha (VI-21-I-II), and we are told that the valuant Pariksité, too, did the same thing when cursed to die bitten by the Taksaka (Bhāganata, 1-19-17)

We propose to take leave of this topic after citing a case of the spirit of religious intoleration displayed by Hanaman on the occasion of his first visit to Lanka Alter discovering Sitä in the Asoka Path, Hanaman wanted to test the fighting strength of Rāva ia 60 it is represented that he laid waste the fine Park, thus taking the offensive (V-41-1-1) This fact was duly reported to Ravana by the Rākṣası guards of Sita (V 42 3 5) When opposed by the king's own Kilbara guards, he is said to have destroyed them fighting with an iron bar (V 42 27 42) Next, we are told, he proceeded to demolish the cartya temple of the Rākṣasas which he actually burnt down, and killed the guards (V 43-1 25) I mention this fact because in ancient India, religious persecution was tarely resorted to

विनीतः, धृतिमान्, मतिमान्, ard महान् (III-72-13), illustrious without a parallel, adhering to the truth, humble, patient, intelligent, and great. Again दक्षः, प्रगत्मः, श्विमान, महायल-पराम्बद: (111-72 14) and कृतज्ञ:, (111-72 14) Elsewhere he is referred to as धर्मात्मा (IV 3 22) religious, विद्वान (IV-7-25) learned, प्रकृत्या निप्णः दृद्धिमांश (IV 15 14), skilful and wise by nature, रणकेविद: : IV 16 19) a skilful soldier, मनस्यिन (IV-297), knowing the true sense of the words and श्रात्मवान (1V-32-1), self controlled Further on we are told that he was नित्यंपरिडतः (VI 19 36), behaving like a learned man in every day affairs, श्रदीनसत्त्वः (VI-20 22), highspirited, प्रियवादिन (39 4) sweet tongued, सर्वज्ञ: (IV 43 2) all-knowing, वाक्यविशास्टः (V 63 15), skilful in the use of words, and ਬਾਸੰਬਿਸ: (IV 40-15) well-versed in the science of Politics Then Sugriva at one place addressed the Vanara chief Satavala as grafficiat (IV 43 5), the Prince of the Politicians Similarly our l'oet at o e place speaks of Jambavan as প্রচনির (V 60 14) well versed in the science of Politics. He also employs the following epithets to describe him, viz वास्यकेविद. (IV 65 20), skilful in the use of words, महामाझ: (IV 65 28), highly intelligent, and शास्त्रवृद्ध्या विचल्लाः (VI 17 45), well read in the Sastras

With regard to Handman, we are fortunate enough to have in possession the names of certain definite subjects in which he is said to have attained proficiency. To propriate Vayu, the Sun god is said to have granted the following boon to Handman बदा च शारामायरेवे शिल्प अविष्यति। तदास्य शास्त्र दास्यामि येन याग्यो मियपति ॥ (VII 36.4)

When he becomes capable of studying the Sastras, I shall teach him in such a way that he becomes an elocutionist.

made of the Kusa grass, the ends of which pointed to the south, with his face turned to the east and having touched water ceremonially (1V-55-20).

The readers' attention here is drawn to the fact that Rāma, too, did exactly the same thing to propitiate the Sea-God before he crossed over to Lanks (VI-21-1-11), and we are told that the valiant Parikṣita, too, did the same thing when cursed to die bitten by the Takṣaka (Bhāgavata, 1-19-17).

We propose to take leave of this topic after citing a case of the spirit of religious intoleration displayed by Hanaman on the occasion of his first visit to Lanka. After discovering Sitä in the Asoka Park, Hanaman wanted to test the fighting strength of Rāvana. So it is represented that he laid waste the fine Park, thus taking the offensive (V-41-1-1). This fact was duly reported to Rāvana by the Rākṣaṣī guards of Sita (V-42-3-5). When opposed by the king's own Kīakara guards, he is said to have destroyed them fighting with an iron bar (V-42-27-42). Next, we are told, he proceeded to demolish the caitya temple of the Rākṣaṣs, which he actually burnt down, and killed the guards (V-43-1-25). I mention this fact because in ancient India, religious persecution was rarely resorted to

Thus, in the field of religion at least, these Vanaras resembled the Aryans more than in any thing else.

Education—That the Vanaras detected to starve out their brains is amply mainfested by the fact that they had culture which was all their own. That they studied divers subjects may be ascertained by a reference to the text. The poet uses here and there different epithets to describe Sugriva—I mean his character and attainments, and here are some of these. We are told that he was RIMPRES, RIGHTLES,

विनीतः, पृतिमान् , मतिमान्, ard महान् (III-72 13). illustrious without a parallel, adhering to the truth, humble, patient, intelligent, and great Again दत्तः, प्रगत्मः, धृतिमान, महायस-पराक्रम: (III-72 14) and फूतवा:, (III-72 14) Elsenhere he is referred to as धर्मातमा (IV 3 22) religious, विद्वान (IV-7-25) learned, प्रकृत्या निपुण: वृद्धिमांश्च (IV 15 14), skilful and wise by nature, रणकाचिद । IV 16 19) a skilful soldier, मनस्थिन (IV-297), knowing the true sense of the words and आत्मवान (IV 32 1), self controlled Further on ne are told that he was faceightsar (VI 19 36), behaving like a learned man in every day affairs, श्रदीनसर्व (VI 20 22), high spirited, प्रियचादिन (39 4) sweet tongoed, सर्वेश (IV 43 2) all knowing, appulatives (\ 52 15), skilful in the use of words, and अर्थविलम: (IV 40 15 ' well versed in the science of Politics Then Sugrit a at one place addressed the Vanara chief Satavala as অর্থবিত্তান (IV 43 5) the Prince of the Politicians Similarly our Poet at o e place speaks of Jambavan as মুঠ্বির (V 60 14) well versed in the science of Politics He also employs the following epithets to describe him, viz वास्यकेविद (IV 65 20), skilful in the use of words, HEIRIE (IV 65 28) highly intelligent, and शास्त्रवद्भवा विचन्त्रणः (VI 17 45), well tend in the Sastras

With regard to Hanaman, we are fortunate enough to have in possession the names of certain definite subjects in which he is said to have attained proficiency. To propitate Väyu, the Sur god is said to have granted the following boon to Hanaman यदा च शासायप्येतु शिक्स प्राचित्री तदास्य शास्त्र वास्यामि येन यास्मी मिष्यांति॥ (VII 36 4)

When he becomes capable of studying the Sastras, I shall teach him in such a way that he becomes an elecutionist

Then during the period of Subriva's exile from Kishindha, he is said to have "traversed the whole earth, from the Udaya girt to the Astacala urged on by a vehement desire to learn the Vyākarana. In a very short time this matchles Vānara attained perfection in all the branches of this particular subject viz the Satras, Vritis, notes thereon, and the appendices (संग्रह्म)' (VII 36 44—45) Consequently we are assured.

न हास्य कथितसङ्गोऽस्ति शास्त्रे वैशारदे छन्दगता तथैव ॥ सर्वासु विवास तपाविधाने प्रस्पर्धतेऽयं हि गुरुं सुराणाम् ।

(VII 36 45-46) nobody excelled him in the knowlenge of the Sastras, as well as in the Science of the composition of the Vedic maintras (हन्स्) He could even challenge the preceptor of the Devas in the knowledge of all the Vidyas as well as in the matter of the rites and ceremonies connected with asceticism

Again, being profoundly impressed with the indroductory speech delivered by Hanuman, on the occasion of his first visit to the exiled princes, Rama is said to have remarked

> नामृग्वेद्विनीतस्य नायज्ञर्वेदधारिए । नासामवेद्विदुपः शत्त्रमेव विभापितुम् ॥ मृन व्याकरणं छत्स्नमनेन बहुधा ध्रुतम् । षद्ध न्याहरतानेन न किञ्चिद्पशन्दितम् ॥

> > (IV 3 28 29)

A man unacquainted with the contents the Rk, the Yajus and the Sāman, cannot speak like that It is certain that he must have studied the Vyākaraņa several times thoroughly, for in course of his long speech, he has not misused a single word. Thus we have seen that the Vanaras studied definite subjects with an eye to their utility in the practical field. Here a word about the language used by

them may not be considered irrelevant. It is just possible that at that time in India the mass of the people used the variant forms of Prakrit in their daily life, whereas the learned folk in their formal talks most probably used the refined Sanskint in conformity with the rules of grammar. For instance, Hanuman on the occasion of his first visit to Sita is in a fix as to the language he should make use of for opening the coversation. He is averse to using the formal Sanskint lest Sita should take him for Ravaya in disguise. So he decides

याचं चोदाहरिष्यामि मानुपीमिह संस्कृताम् ॥

(V-30-17)

to make use of the colloquial Sanskrit Thus, I am inclined to believe that the Vanaras too, like others used Prakit under ordinary circumstances and the formal Sanskrit under special ones. In addition to their being bookish some of these Variaras were great travellers who had viewed things with their own eyes We have already seen how Jambavan had tramped round the world full twenty one times when the Devas somed hands with the Asuras to churn the sea m search of the Amrts (IV 66 32 33) Value, it has been already alluded to above, used to visit the four seas daily for offering his Sandhya prayers (VII 34 16 18) Again, for fear of losing his life in the hands of Valin. Sugriva toured round the four quarters of the clobe, and the results of his experiences have been accorded a prominent place in the Ramayana (IV 46 10 20) And the knowledge of the wide world he gained then, was utilised by him when he sent out search parties under various Vanara chiefs to discover Sila (TV-40-43)

Again, these Vanaras were past masters in the act of healing, and as such they were acquainted with the medicinal properties of numerous herbs and roots. We are told that the Vānara messengers deputed by Hanuman at the desire of Sugriva, on their return journey visited the place where in by-gone days Mahadeva had celebrated a sacrifice on the Himalayas, and brought for their king fuits, roots and medicinal herbs that grew there (IV-37-27-32). Again, when Indra-ut had seriously wounded Rama and Laksmana, Susena proposed to send Sampati, Panasa and others to the Candra and the Drona hills in the Ksiroda sea to fetch the divine herbs, सञ्जीवकरणी and विशल्पो, that grew there (VI-50-30-31). Again, when Indrajit had wounded most of the Vanara chiefs along with Rama and Laksmana a second time, on that occasion we are told that Jamba-van sent Hanuman to fetch four medicinal herbs मृतसञ्जीयनी. चिशल्य-करणी. सुवर्णकरणी and सन्धानी from the Osadhi hills in the Himalayan regions, that alone could restore the wounded Vanaras (V1 74 29-34) Again on the destruction of Indraut, Susena, at the desire of Rama, cured Laksmana and other disabled Vanara soldiers of their wounds by applying efficacious remedies (VI-91-20-27). Once more when Rayana out of spite had wounded Laksmana with his Sakti dart, Susena directed Hanuman to go once more to the Osadhı Inlis and to get विशल्यकरणी, सावएयकरणी, सञ्जीव-करणी and सन्धानी for bringing round the younger Prince (VI-101-29-32)

Mode of warfare—Valmiki desembes these Vanaras as चिलामहरणाः चर्चे सर्वे पर्यतयोधिनः । नखदृष्टाष्ट्याः सर्वे धर्मे सर्वोद्धकोधिदाः ॥

(1. 17. 25-26)

fighting with hills and stones, having nails and teeth for their weapons and knowing the use of all weapons. Elsewhere we are told that these Vinaras on reaching Lanks

ते तु वानरशादृंसाः शादृंसा इव दंष्ट्रिणः । गृहीत्वा द्वमशैलाशान् दृष्टा युद्धाय सस्थिरे ॥

(V1-47-45)

stood ready to give battle holding the ends of trees and stones, and he goes on telling this fact and nameom Further on, Valmik tells u, how they commenced the warfare when Rama gave the word of command —

"On the word of comesand having been given by Rama, every individual Vaarah raised a terrific yell impelled by a desire to make a rash. The Vaarah chiefs thought of teaning open the town by striking it with huge hill tops and reducing it to pieces with their blows. These uproofing numerous trees, both small and big, climbed on the ramparts of Lanka, in the very presence of Rawapa. Thus those copper faced and gold coloured. Vanaras, ready to due for Rama, made a rush at the walls of Lanka, brandishing their weapons that consisted of the Sal trees and stones. Then entering the town they began to demolish the ramparts and innumerable perches with huge stones and fists, filled up the trench with dust, hill fence, straw, and wood." (VI 42 10 18)

Thus Valimlik wants us to believe that these Vanaras were deficient in the use of signs, or missiles that could be hurled at the encemy from a distance When at close quarters, it is unaccessary for us to say, they took to wrestling We know, for instance, that Valim lought a wrestling duel with Dundebhi who ha lassumed the form of a buffalo. Ultimately we are told that having belshoured him mercilesily with his first, thighs, feet, stones and trees, Valin killed his antagonist by dashing him or the ground.

(IV-11-40 47)

Similarly the preliminary contest between Valin and Sugriva was fought mainly with a free exchange of slaps and fists, till badly wounded, Sugriva gave way and took to flight (IV 12 17 23) Again, in the final encounter, the contest began with boxing Sugriva, then, belaboured Valin with a huge Sal tree Sugriva next was worsted in a wrestling match, during which trees, stones, nails, kicks and slaps were freely exchanged Meanwhile, Rama finding Sugriva driven to the wall, brought down his adversary with a deadly arrow—(IV 16 14 39)

But in this particular branch of fighting, viz wrestling the Vanaras, it seems, had attained great perfection. Valmiki happening to give a detailed description of the wrestling contest between Rayana and Sugniva, and the slights and tricks employed by each, really rouses our admiration We are told that 'the contest began with free exchange of fists, slaps, kicks and striking with the elbows Then there were throws and falls Next, the one barred with the arm the onslaught of the other, followed by walking in circles in a guarded way. Then they advanced a few steps forward and then retreated in a zig zag fashon. Lastly we are told how each took recourse to circular movements, hasty with drawals, to make the enemy miss the aim, advancing steadily towards the enemy eying him all the time, withdrawals after defeats to a corner running towards the enemy, resting the arms on the thighs and doubling the body, striking the enemy at every pace, locking the arms on the breast and extending the arms to hold the arms of the enemy etc' (VI 40 15 26) And need we say that our wrestlers make use of these very tricks till to day ? The Vanaras also knew well the art of boxing and we are told how Augada fought with a Rakiasa general Vajra Danitra by name, a boxing contest

But it seems that the Vanaras knew the use of arms as well and that they sometime, actually made use of these. In

the course of the description of these Vanaras, the poet along with others, uses the following terms, knowing the use of all weapons, like the nectar consuming Devas (1-17 6) "knowing the use of all weapons (1 17 26), Handman pays a compliment to his fellow Vanaras when he calls them softictin (V 59 8)

Besides, Laksmana while going to Kiskindha to see Sugriva, came across Vanara goarda liberally provided with arms, out side the town limits (IV 31 19) again he saw that armed soldiers guarded the gates of Sugriva's palace (IV 33 17)

Again, later on, we are taid how the crows prace Again, later on, we are taid how the crows prace with the ship of the same of

Anusements—Life is hardly worth luning without a loud, listy laugh! And though our poet does not tell us exactly, how our herces lost themselves in a loud laughter that taking away the cares and wornes of this earth, transplanted them for the time being to the bowers of blass where there regins eternal beautifule and sweet forget fulness; yet we are in a position to assert that the Vanaras had their own way of anusing themselves.

There is no doubt that they cultivated the art of music During his lonely sopour on the Parsavana hills, Rima used to lister to the sweet music of the Vianara musicitis, (i at came floating on the six from the neighbouring ki-kindhi (IV 27 27) Aguin, Lak-ma a caucht the strains of the Vianara music when he entered Sagativas harem, and this move, we are told, was stren slic in its get up as it agreed in Leeping time and calence and nich in croamenistica (IV-33 21). Again, it has already been alluded to above how steepes in wine and women Sugriva, on his accession to the throat managed to banish from his mind, temporarily at least, th world outside and its concerns. Mention has also been made above as to the way in which Angada and his underling notified their success in locating the whereabouts of Sita to the dreadful court of Kiskindha, (V 61 62).

Position of the she vanaras-Says the great law-gives Manu

यत्र नार्यस्तु पृज्यन्ते रमन्ते तत्र देवताः । यत्रेतास्तु न पृज्यन्ते सर्वास्तत्राफलाः क्रियाः॥ (III 56)

The gods delight in dwelling at a place where the womenfolk are honoured, and where these are treated with scant respect there every thing goes wrong Unfortunately Valmik; introduces only two she Vanaras in the course of his narrative Of these we know Rumā—the wrife of Sugrīva—only by name, of the other viz Tarā we can say that we know something about her in extense. And though aware of the danger of generalising things from a single instance, we could not check the temptation of rounding off the subject matter of this paper by a brief reference to this point

Indeed, the high estimation in which Tārā was held by the Vānaras in general, and by Valin and Sugriva in particular, is simply bewildering, and the wonder of all wonders is this that the Aryan poet too shares this admiration for bee along with her own people. Valinika is unstanted in lavishing suitable epithets to describe her character and attainments. He calls her attributantiarial (IV-16 1), having a face bright like the moon, विषयादियो विद्या (IV-16 11) sweet tongued, sincere, मन्त्रविष् (IV-16 12), well versed in the Maotras, सन्त्री (IV-19 7), a chaste lady, इविद्यालय (IV-19 15),

having a beautiful face, चारहासिनी (IV 19 17) sweet smiling, मासिनी (IV 20 2), wrathful, आंतरावर्षा (IV 20 26), having a colour that could not be talked lightly of खारश्या (IV 23 1), well known in the world, चारनेया, किपिसहताया, अश्वीस्तराया (IV 24 26), with beautiful eyes, consort of the lion of the Vanaras high spirited, आयों (IV 24 29), an honourable lady, सर्विस्ता (IV 24 30), intellectual, and सत्तराण (IV 33 38), carrying auspicious marks Valin who knew her better speaks of her in the following terms —सर्वेश (IV 17 41), the omniscient, तप्रियों (IV 18 55), leading a religious life

Before expiring, he is said to have bestowed high compliments on her while taking leave of Sugriva

सुपेलदुहिता चेयमर्थस्टमविनिश्चये । श्रीत्यातिकं च विविधे सर्वत परिनिष्टिता ॥ यदेपा साध्विति मुपात्रायं तन्मुकसग्रयम् । नहिं तारामत किञ्चिदन्यया परिवर्षते ॥ (IV 22 13—14)

Tars, the daughter of Sucena is well accustemed to look into the springs of all actions is well versed in the science dealing with omens and is skilful in doing everything. What ever action she approves of let that he done without hesitation, for she seldem miscalculates. And the poor Valin came to realise this fact at the cost of his life for before he went out to give the britle to Sugriva Tart had most solemn 13 advised him not to go (IV 15 6 30). Again Handman, while consoling Tark on the death of Valin calls her a quart or a blue stocking (IV 21 5). Lakemana too, sings in the same strain and calls her a quartati (IV 33 49), knowing well, the apprings of actions. Argada also uses the following respectful terms to describe her.

प्रशुरवा प्रिवपुत्रा सा सानुषीशा तपस्थिनी 🛊 (IV-55 15)

Naturally of a loving disposition, fond of child and devoted to religious pursuits. Such then was the high regard in which Tart was held in olden times, and we may not be accused of committing a grave error when we say that the Vanaras, under ordinary circumstances, treated their womenfolk with respect.

And this Tara, before Valin died, was most solemnly committed to the care of Rama in these words

मद्दोपकृतदेश्यां तां यथा तारां तपस्विनीम् । सुत्रीवे। नावमन्येत तथावस्थातमहीति ॥ (IV-18 55)

Be good enough to acquit yourself in such a way that Sugriva might not dishonour her—the pious lady who has been reduced to this pitiable state through my fault!

And how honorably kept!

Conclusion—Such were the Vanaras of old and such was their civilisation. Thus giving a direct lie to the testimony of the Bhagavata Purana,

तताऽर्थकामाभिनिषेशितात्मनां शुनां कपीनामिय (I-18-45)

that the Vinaras even like the dogs are devoted exclusively to Artha and Kāma, we actually find that Dharma too equally engaged their ittention, and this was the summum bonum of life aimed at by the Arjans of old

Now the last question that awaits solution in this connection, is—who were these Vinaras of old? There are people who are pleased to call these non Aryans. I remember to have seen the abstract of a paper, published in the Proceedings of the Third Or mial Conference held at Madna in this connection. In it the learned writer ined to identify the Vanaras of old with certain aboriginal tibes inhabiting the central parts of C. P. I do not want to pick up a quarrel with the above mentioned scholar, but I would only like to

nunte his attention to the fact that Volunki never intended that his creations should be misconstrued in this way. I am stree that he directly or indirectly, never calls the Vanaras non Aryans. Only once I remember the wrathful Lakimana uses the word starts with reference to Sugriva and there the sense is clear. When he says to the Vanara king.

श्रनार्यस्यं इत्तामध मिथ्यायादी च वानर । पूर्वे इतार्थी रामस्य न तत्वतिकरीपि यत् ॥ (१४-३4-13)

be means to abuse him and ward here does not mean a non-Arvan, but rude or uncivil Again if you call a spade a spade. it will not be taken as an abuse, and if we perforce apply the sense of non Arran here then it must be understood that Laksmana was conscious of the fact that he was abusing an Arya by using the term ward On the contrary Valmiki more than once uses the term आर्थ with reference to these Vanuras It is certainly not a cuphemism when the poet calls Tara mui (V 24 29), and when Tara calls Valin muqu (IV-19 27) Again, these Vanaras were neither आगति. nor श्रवसा, nor शतनाः nor श्रतिन्द्र (see lyergar's "Life in the Age of the Mantras). And if the difference between the Aryas of the Vedic age and the non Aryan Dasyns was not one of race, but of cult alone, then how are we to call these Fire worshipping, and Indra and Brahma worshipping, Vanatas, non-Aryans? Under these circumstances I am strongly in favour of suspecting that these Vanaras were the Vratvas of the first imgration, who had taken to the fresh fields and pastures new of the Decean on the advent of the Arrans of the second migration, and that they had already been reclaimed before Rama in the course of his wanderings visited their habitat. But when all has been said about the Vanaras, the fact remains that their tail could not be reconciled with sober history, and here I plead my irrability

IV-A COMPARISON OF THE CONTENTS OF THE RGVEDA-, VÂJABANEYI-,

TAITTIRIYA-, AND ATHARVAVEDA-(CÂTURA-DHYAYIKA) PRÂTIŜAKHYAS

By Mangal Deva Shastri-

It is recognised that the study of the different Pratisakhyas is indispensable not only to the textual criticism of the different Vedic Sainhitas but also to the interpretation. of many a doubtful form in their texts. Their importance to the student of the history of Vedic Grammar which 'is represented in Sanskrit literature only by a few more or less scientific treatises cannot be exargerated. Similar is the case if we look at them from the point of view of the history of Indo-Aryan sounds or Indian phonetics. At least one of them also affords a good deal of material for the study of Vedic metre. It is strange that the study of this important branch of Sanskrit literature, which as its name implies used to be an essential feature of the courses of study prevalent. in olden days, in the different branches or Sakhar of the learned community in India, has for a long time been neclected, so much so that even such great writers as Savana and others do not show much familianty with these works in their Vedic commentaries. This accounts for the unsatisfactory state, in many places, of their texts and commentaries. It is a matter of great satisfaction, however, that these works so long involved in darkness and obscurity are again seeing the light of the day through the labours of modern

It is clear that comparative study, in detail, of the works in question is an essential preliminary for our being able to arrive at some definite results with regard to the

scholarship.

different studies or sciences related to them. Though it is true that a great bulk of these works is concerned only with a particular Vedic Sanhita, the scientific theores underlying all their treatment are generally the same or st least similar The standard of development of the different studies represented in them is also, generally speaking, the same it being so, it is not impossible to draw, from their comparative study, general results which may throw a good deal of light on the scientific and historical study of the different sciences referred to above. In view of these facts a detailed and exhaustive comparison of the contents of the different Pratisakhyas, given below, is bound to be of interest to the students of Vedic philology The general results which can be drawn on the basis of this study will be dealt with in due course in subsequent sections. It must be admitted that something in this direction has been alteredy accomplished by Prof Whitney in his learned and scholarly editions of the Tantinya and Atharva Praticakhyas and to a less extent also by Prof Weber in his Vajasaneyi Prätišakhya but apart from this material fact that their treatment of this matter is not exhaustive, their comparisons, dispersed as they are throughout the whole books, also cannot be readily used and properly studied

A few words about the tests used and the references given below are also necessary here. For the Rg. Prat, of course, I have followed my sensi method of referring to a Papala and to the number of the Sotra in that Papala, and that, too, according to my own edition of the work, which, I hope, will be, before long, in the hands of the public. As for the Vaj. Prat, unfortunately, owing to their unsatisfactory nature, I could not strictly follow any one of the published tests. The cases where, with regard to reference, I have deviated from Prof. Weber seltion are as follows. In Ch. III my references do not correspond to his numbering.

of the Sciras, as I refer to his Sciras, 1 (a) and 1 as 1 and 2 respectively and as the Scira (RRIE '9) 60, according to my reference, is not counted at all by Weber. So is the case with Ch. IV. Weber includes Sciras 52 and 55 in one Scira (52). He numbers Sciras 58 and 59 as 57 and 57 (a) respectively. An additional Scira (115: 7) for fixed him in the text. I may further add that I have referred to Weber's 1. 39 and 1. 40 respectively as I. 40 and 1. 39. In other cases, of course, I laws throughout followed Prof. Weber. The references to the Tait. Prät and Ath. Prät. are according to the editions of Prof. Withteep.

As will appear from a careful study of the following comparison, my interpretation of some Stiras (e.g. Tait. Pat. XI.19) is different from that of Prof. Whitney and others. In the interest of brewty I have omitted to point out such differences in the following pages.

The order of various topics given under different heads cannot be said to be strictly scientific in all respects. On the whole they are arranged according to their subject matter, but in some cases, especially when the matter is not common even to any two Prätrakhyas, each Prätuakhya is taken and dealt with separately in the order which is adopted for it in, the following table

Then followed the Humanistic Realism. This was an attempt to lay emphasis upon the study of Nature, of man and of social institutions. But the upholders of this view believed that this could be done best only through the study of the life, writings and investigations of the ancients The Realistic Humanists gave much wider significance to the narrow conception of education of the pure Humanists; but they, nevertheless, maintained much of the old in as much as they held that nothing nobler and greater or higher than what the ancients had accomplished was possible. Thus 'if military science was to be studied, it could in no place be better searched for than in Caesar and in Xenophon, was agriculture to be practised, no better guide was to be found than Virgil or Columella, was architecture to be mastered, no better way existed than through Vitruvius, was geography to be considered, it must be through Mela or Solinus, was medicine to be understood no better means than Celous existed, was natural history to be appreciated, there was no more adequate source of information than Plin, and Seneca 's

The subsequent period was a period of extreme change which began initially under the Reformation. With the spread of Sense Realism we get for the first time the formulation of a general theory of education based upon rational rather than upon empirical ground. The old practice of counting one's educational advancement in terms of 'memory activities' was completely overthrown and was supplanted by a new conception which was derived from the lundamental belief that knowledge comes primarily through the senses, that education is consequently founded on a training in sense perception and not in memorising facts of books.

[.] Monroe . A text book in the History of Education, page 444

that will be serviceable in most dissimilar experiences or activities, that will be available in every situation, that will be applicable to the solution of problems presented by a subject, however remote in kind from the one furnishing the occasion for the original disciplinary experience. It was further believed that the study of subjects such as mathematics and logic and classical languages developed the memory and the reasoning faculty. Grammar was given importance as it was supposed to develope accuracy and precision. The special demands of the professional and technical studies were to be given no consideration, as 'the powers of the mind' once developed by the study of a few selected subjects would spread to and affect all the situations of life, and all that was needed was to direct the ability generated by the formal training of the school into the desired channel

Many interesting experiments have been made during the past few years on this question of 'spread'; and it has been proved beyond doubt that there is not much truth in it and the study of a particular subject cannot necessarily be useful in other subjects also Thus the habit of inductive reasoning of the scientist cannot be of any use to him in his linguistic activities where a different method of work is demanded, nor can be be expected to fulfil the function of an artist on the ground that he hapt ened to be very good at his experiments once. Careful observations have been made to determine whether the habit of 'producing neat papers in arithmetic will function with reference to neat written work in other studies and it has been found that there was not the slightest improvement in language and spelling papers, although the improvement in the arithmetic papers was noticeable from the very first 'a Yes. the 'spread' from one subject to another is possible if

they are similar and allied, and the degree of success in the study of a subject on the strength of the knowledge of another subject will be in direct proportion to the extent to which the former can be associated with the latter

While studying the Ancient Indian Literature it came to my mind to find out whether the ancient Indian educators of our country have to say anything regarding this doctrine of Formal Training. It was really surprising to find recorded in clear words an opinion which the modern psychologists could arrive at only recently. Thus while emphasising the need of the study of the Niti Sistra Sukrāchārja says.—

'Other Sastras treat of certain specialised branches of human activity (and hence can be useful in a limited sense) *

'But one who studies only one Sistra cannot decide upon any course of action. The intelligent man, therefore, should inspect many sciences and always study many Sastras t.

And while talking about Grammar, Logic, Philosophy and the Science of rituals, practices and ceremonies, he says --

These sciences, moreover, treat only of the topic specially assigned to each (and give the truth about them only), and hence are always cared for and mastered by such persons only as have need for those teachings (i.e. whose knowledge and occupation require a knowledge of those truths)

Here we find a clear disparaging of the Doctrine of Formal Training The one sidedness of the mind due to the study of only one branch of knowledge and the inability and

Sukraniti—I 8

⁺ Śukraniti--I-18-19

the unfitness of the grammarians, logicians, philosophers and experts in Karma Kanda to apply the power of their learning to a subject which is not familiar to them is a clear proof of the great Ra's clear vision of the futility of the belief that the power and discipline of the mind acquired from the study of one subject could spread to and be available for other subjects also. And consequently while mentioning the qualifications of an official of the state he demanded with an equal amount of proficiency the knowledge of all the sciences which were required in virtue of the office he was to hold, and does nowhere urge the supremacy of any one subject or a group of subjects over other subjects as conferring upon the student powers of intellect and wisdom which could help him in all the situations of life. The special requirements of the professional and technical studies which would qualify a man for some particular profession in the society or for some particular office in the service of the state, did not fail to attract his attention and make it clear to him that they had their own place, own method and own principles in education and could in no way be made subordinate to, or understood as by products of, other sciences Thus while speaking about the education of the princes he says -

'He (the king) should make the children of his family well up in the Niti Sastrs, proficients in archery, capable of undergoing strains and of hearing hirsh words and punishments, habituated to the feats of arms, master of all arts and sciences, upright in morals as well as disciplined through his ministers and counsellors '*

^{*} Śukraniti--- II, 43-46

See also Kadambari The prince Chandrapi la was given a training in 16 various sciences including carpentry, ivory work, &c

And about the qualifications of an ambassador he says -

'That man is chosen as ambassador who knows the innermost feelings of other men, who can study their expressions and emotions (Psychology), who has a good memory, knows the conditions of time (History) and place (Geography), can speak well and is featless.

And about the qualifications of the commanders and the soldiers of armies he says \leadsto

Those who are well up in Niiisästras, the use of arms and ammunitions, manipulations of battle arrays, and the art of management and discipline, who are not too young but of middle age, who are brave, self controlled, able bodied, always mindful of their own duties, devoted to their masters, haters of enemies, should be made commanders and soldiers, whether they are Sadras or heattings. Vaisyas or descended from Mlechchhas †

He gave no consideration to the special capabilities or incapabilities of the students on the ground that the discipline of their formal training would make them fit for every obligation that life made upon education and those of them that were in a position to undergo that training were considered unfit for the higher offices or functions or to receive the privileges and distinctions which would otherwise have been due to them. Sukrāchārya knew well the hollowness and falsity of such a belief and

^{*}See also Kidamban, II 174-175 See also -

⁽¹⁾ Matsya Purana, pp 219, 223 &

⁽²⁾ Kautilya Artha Śastra, Chapt VIII

advises his people that a great skill and discrimination is required in selecting proper men for the state or even for private business, that for the well being of the society and for the success of organisations it was imperative that the special aptitude of the people should be talen into account, and that they should be given work which is in harmony with the line of their special proficiency. While finishing his advice on the topic, he comes to a very important educational principle which at once shows the psychological achie ements of the ancient Indian educators. He says that every individual, whoever he may be and however incapable he may prove himself in his ordinary dealines in the society. has always got some special line of interest which he has selected for himself, and has therefore acquired in that line some proficiency which distinguishes him as a fit man for the corresponding work, exactly in the same way as every letter of a mantra has its own importance and every plant has got its own medicinal value. The wise is one who has the eyes to see the special powers of the individuals, the method to develope those powers and the wisdom to make use of them. Thus we find -

'There is no letter (of alphabet) which bears no charm, there is no root (of plant) that possesses no medicinal properties. So also there is no man who is (utterly) unfit. But the rants is the person who can connect.*

According to him every branch of knowledge was to be respected and the king was expected to extend his patronage to all the learned men, irrespective of the science they professed to know Even the knowledge of Mantras and

[.] Sukramtı—11, 254-255,

See also footnote page 77, Sukraniti Panini Office publica-

ras entitled the persons to distinctions and aids of the equally as that of Srutis Thus we find:—

Those who practise penances, those who are chantable, e who are proficient in revealed literature (the Vedas) Smrtis, those who are well versed in Puranas, those is now the Sutras, the astrologers, the sorcerers, those is are masters of Ayuvreda (medical science), those who are sed in the religious rites and ceremonies, those who cutse the virtues laid down in the Thirtiss and those ters who are mentionous, intelligent and masters of their sessions—these classes of men the king should worship and unitary by stipends, gifts and honours.

It is now obvious that the learned Rsi was perfectly ear on the point that the study of a particular subject could it help that of another. But at the same time there is mple proof to show that he was not an extremist like uxley or Spencer who laid the whole emphasis on the onten s of study. He believed fully that there was a spread if mental powers from one subject to another if there were common elements or features. Thus is praising the utility of Nits Sastra he makes it obligatory for every individual of the society, who wished to promote his social economic interest, to have a careful study of it on the ground that it was a system of moral philosophy extracted in the form of an essence, as at were, from the entire mass of social, economical and political experiences and knowledge of man and compiled in the form of a systematic science on the art of living, equally applicable to all irrespective of the department of activity in life. When side by side with this he mentions that all Sastras have a limited usefulness, being adapted to special purposes and not meant to be of universal interest to man as such he makes his views still clear. Thus we find -

[.] Sukraniti-11 246 -250,

'Niti Sastra conduces to the desire, and interests of all and hence is respected and followed by all ' *

Are these sciences (Grammar, Logic, Philosophy, etc.) of any use to persons following their ordinary affairs or avocations in supplying them with skill and intelligence? But on the other hand without Niti the stability of no man's affair can be maintained just as without food the physical body of man cannot be maintained and preserved.

"The Niti Sastra that is common to the king and the common wealth (people) has been narrated in brief. This remembered by the ling is useful to him."

Even in an age as old as that of Chandra Gupta Maurya it was clear to the Hindu mind that the problem of education was a complex one and that if it was intended that it should be of some practical use to man it was to be made to make ample provision for all the departments of life Kautilya strongly opposes the view of his predecessors who held that the study of two sciences, Varta (agriculture, cattle breeding and trade) and Danda Niti (science of Government) were sufficient to meet all the demands of life and all the other sciences had their origin and end in these § He urges that there were a few primary sciences each fixed in response to a particular demand of the human nature and intended for a particular purpose in the human life. Thus there was the spiritual life of the individual and it was to be developed and perfected by the study of the philosophy of religion and the practice of Yoga. Then there were the

Sukran ti I, 23 24

[†] Sukranıtı II 20 24

^{; &}quot; III 652-653

[§] Kautilya Artha Sistra, Chapter II

problems of the moral and the social life which were to be fostered and regulated by the study of the Vedas The physical requirements of life such as wealth, riches, worldly enjoyments and pleasures were also to be given full consideration and for that the individual was taught Vārtā (agriculture, cattle breeding and trade) And finally lessons on practical wisdom were to be give i to promote efficiency, prudence and control by prescribing a course of Dangantit (accence of government). No where is there even the slightest limit to give preference to any one of these sciences over the rest. Each had its own importance and purpose in education.

And when we find that the ancient Indian Ru is constantly exhorting the teachers to secure a thorough training of the organs of the series of the pupils and to make education intensely practical by making them act strictly according to the precepts of the Sistras taught to them we are at once convinced of the fact that the ancient Indian education was more of a sense realist, or I should say, of a psychologist thru of a 'thisciplinarian'. We find —

Absence of discrepancy in the perception of sound, touch, colour flavour and scent by means of the ear, the skin, the eyes, the tongue and the nose is what is meant by the restraint of the organs of sense. Strict observance of the

[•] Kautilya Artha Ś stra Chapter II and IV He (King) should learn the threefold knowledge (of the Vedas) from those who possess the knowledge thereof (Vedas), and (and of) policy, logic, and knowledge of Self, but business from the people Manu VII 43. Obviously for Manu the know ledge of the Vedas etc. could not help a man in learning the science of business. The king should learn the Vedas Politics, Logic, I hi osophy, and Temporal Science. He should folle t information from ord many people and keep his senses unif it control. Matsya Puri 4, expx 53—55.

precepts of sciences also mean the same, for the sole aim of education or all the sciences is nothing but restraint of the organs of sense. •.

Yes, there is a passage in the hautilyn Artha Sistra which may well be urged against this statement and may be taken as an indication of the Rsis disciplinary conception of education. He says at one place that 'when seen in the light of these sciences, the science of Anvikski (Philosophy of Sānkhya, Yoga and Lokayata) (Athilism)) is most bene ficial to the world, keeps the mind steady and firm in well and woe alike, and bestows excellence of foresight, speech and action. Light to all kinds of knowledge, easy means to accomplish all kinds of acts and receptable of all kinds of virtues is the science of Anvikski ever held to be 't

A little reflection will show that so far as the modern views regarding the Doctrine of Formal Fraining are concerned he may well be classified with the modern educators rather than with the old 'disciplinarians. We have seen that observations have proved that the transfer of mental powers from one sphere of mental activity to a other is possible to the extent there are points of similarity between them. The strength of will, the power of concentration and voluntary attention the nervous control and the freedom from emotions, passions and excitements which one acquires by the practice of yoga, or the serenity of thought and the sublimity of ideals, the awereness of the workings of the modes of Praktu and hence of the body and the mind itself.

Kautilva Artha Sistra, Chapter VI
 See also the Introduction by S. M. Mitra to 'Hindu mind Training by an Anglo—Saxon mother—Longmans, Green & Co.

f Kautilya Artha Sistra, Chapter II

the knowledge of the infallibility of the Law of Karma, the cognisance of the relation between Prakrti and Purusa which are the fruits of the study of philosophy and metaphysics are in fact the requirements of man as man aid become on that account the unavoidable accessories of his worldly existence equally serviceable in all the walks of life and equally applicable to all the phases of human retiruit

Finally, when we find the ancient Rsi prescribing to the students a universal Code of Dharma* and making it obligatory for each of them to study and follow that Code not as a part of any special professional or technical studies, but as a collection of precepts fixed for the good of man as man1, and again when we find them saying to the students that Dharma is to be followed and adhered to for the sake of Dharma, we can beyond doubt, say that they reached very nearly to the most modern views regarding the problem. This cannot better be explained further than by quoting a passage from Professor Dunville's Child-Mind, in which he says.—

Further it is to be remembered that there are elements which can be made to permeate the whole of life ideals, purposes, aspirations or ambitions. Moral instruction and training, for instance, whether undertaken at specific times or only incidentally in connection with various lessons, is

not given with a view to excellence in one particular branch of activity; we want it to have an effect on the whole of life. It is true that such a habit as that f nentness may develope within a certain subject (e. 6 writhmetic) and show no signs of spreading to other subjects, eg written composition). But if the mere habit is based upon an ideal ("whatever is worth doing is worth doing well") conscious by accepted by the individual concerned, it will tend to spread to other subjects."

VI —HISTORY AND BIBLIOGRAPHY OF NYÂYA VAISESIKA LITERATURE

Continued from Vol. IV, p 70

BY GOPI NATH LAVIRAL

V -HARIDĀSA NYĀŸĀLANĀĀRA BHATTĀCHĀRYĀ

Of all the Commentaries on the Karika portion of the Kusumānjali the one by Handāsa, a man of Nadia, has un doubtedly gained the widest currency in Bengal. And it is as the author of this popular annotation of the Karikas rather than for any other works, that he is remembered by the modern Pandits of Bengal and Mithila.

If the tradition recorded by Mm Chandra Kinta Tarkilahkara in the Preface (p. i) to his Commentary on Kusumanjah Haridasi (Saka 1810) regarding Haridasa e journey to Mithill for the study of Nyiya Sistra and his return home with the whole of the Kusuminjah (including the prose portion also) in his memory be authentic, the event certainly marks an episode of supreme historical interest in the study of philosophy in Bengal. For it inaugurated studies and speculations, and inspired literary activities which have continued into the present day.

To what time Handisa should be assigned is a question to which no final answer can be given at pre-ent. It is sure that he was estiter than Saka 1521 or 1599 4 D when a Ms of his Commentary on the Alaka was transcribed and the earlier limit of his age is the date of Alaka itself. I am disposed however to take him as a pupil of V sudeva Sarrabhauma.

e Bat see Navadripa Mahima, p. 61

Among his contributions to the philosophical literature of the country the following are known

A Commentaries on

- (a) Udayanāchārya's
 - ı Kusumanıalı Kankas
- (b) Gangesa's
 - া Tattva chintamani (= মন্ত্ৰায়)*, and
- (c) Pakadhara's
 - 1 Tattva chint manyaloka†

VI JÄNAKINÄTHA BHATTÄCHÄRYA CHŪDAMANI

Another writer who has had a large number of commen tators and welded great influence on Contemporary thought was Janakinatha, more popularly known as 'Bhaṭṭachārṭa Chaḍāmaṇ His most famous work was न्यायसिवान्तमञ्जते, in which he quotes Sinaditya, p 23, Chiniamanikit, p 217, Njayabhāskarakit, p 223 and Murān Misra, p 285, and mentions by name his two earlier treatises, 112 (a) मिंगुसरोचिनियन्य (Ny Si Manj pp 18, 185), probably a commentary on Tattvachintamani and (b) तारपर्यदोपक (p 185)

VII - RAGHUNĂTHA ŠIROMANI

After Vasudeva the philosopher that calls for special notice here is the great Raghunatha variously styled Siromani, Tarkika Siromani or Tarkika Chiuamani He was the

[•] Sastn's Report 1895 1000 , p 15 Peterson, VI, no 218, p 16

t Mitras Notices, Nos 2850 2852 The three Mss dealing with the three sections of the work ভাত সংবাধ কৰুবাৰ ই মাৰ্ were cope t by one Kandarpa Ray on the bank of the Ganges (ব মুবাৰ্থিব) ৷ শ্বিম 1523 (নিমুম্বিবিভিন্নতা মিন্ট্) ; 1522 and 1521 respectively

greatest figure in Nadia, and next to Gangeán the greatest in the field. His studies ranged over a wide area, and his philosophical speculations were as deep as they were varied

The story of Raghunatha's life is not known in detail He was born in a very humble Brahman family of Panchakhanda in Sylhet (Assam), where his ancestor Śridhara Acharya had migrated from Mithila in 53 Tripura Era (=643 A D) and settled On the death of his father. Gobinda Chakravarti, at an early age the family was thrown into hopeless confusion. There was no earning hand in the house. The burden of expenses fell on Raghunatha's mother, Sita Devi but how long could the poor widow manage it? She soon found herself in great straits. It is said that at this time a batch of pilgrims from her village was setting out on a holy trip to Navadyina for a dip in the Ganges Sita Devi, with her infant son. felt inclined to accompany this party -which she did, but before they could reach Nadia Sita fell senously ill and was deserted by her companions. Upon recovery she resumed her sourney and reached her destination in the company of a kind merchant of the place. At Nadia Sita took shelter with the great Vasudeva Sarvabhauma who received Raghun itha into his favour and began to teach him with creat care

It is said that in his early life he had been a student of Visualeya but later on he went to Mithila in order to study the knotty points of Nyaya Sastra with Pakeadhara whose reputation of scholarship attracted him. He is said to have been blind of an eye, and so the tradition runs that when he stood in presence of Pakeadhara eager to sit at his feet and dirak at that fount of learning of which he had heard so much talked, the latter being struck by his odd look, questioned him thus

शारागडलः सहस्रातः विरूपात्तरितलेखनः । श्रम्ये दिलाखनाः सर्वे के। भवानेकलाखनः ॥

At this query of Paksadhara Raghunātha was much annoyed at heart, but he was not to be daunted. He retorted readily "He who is capable of giving an eye (power of vision) to the eyeless is to be considered a real teacher, while the rest are mere names (तद्ने तामधारिए)"

On his return from Mithila with the laurels yet fresh upon his head Raghunātha won a great name in the country Students from various parts gathered round him and listened to his learned discourses

He wrote in the course of his teachers life a series of works including numerous commentaries and an original treatise dealing with philosophy,

A Commentaries on

- (a) Udayana s
 - Atmatattvaviveka (=दीपिका or बोद्धधिकार विवृति)*
 (Stein p 135),

and ii Nyaya Kusumanjali

- (b) Śrī Harsa s
 - ा Khandanakhanda Khadya (= हीधिति),
- (c) Vallabha s
 - 1 Nyayalilavati This is identical with (e) ii
- (d) Gangesa s
 - । Tattvachintamanı (=दाधिति),

e There are two old Mss of Raghunatha's Commentary on Atmatattwavieka in the Govt Sanskrit Library Benares—one (called erroneously in the Colophon wighterin) dated Saka 1538 and Samat 1672 (=1616 A D) and the other dated Saka 1516 (=1594 A D)

and (e) Vardhamāna's

- 1. K raņāvaliprakāša (दीधिति or विमृति or विवृति), and u. Nyāvalilavatiprakāša.
- B And an original tract, called
 - पदार्थतस्य निरूपणम्, variously called पदार्थस्य एडनम्
 ६ पदार्थतस्य विवेचनम्

Among the above treatises the commentry on Chitaman, known as মাণুহাখিলি, has been justly the most successful and popular. Since its publication this work has driven all the venerable old commentaries out of fashion, so much so that the very names of works like Aloka (by Pakṣadhara) and Prakāsa (by Ruchidatta) are now well migh forgotten. The whole host of later writers drew upon him for their inspiration.

Raghun tha was a bold, subtle and original thinker, and it would seem from the words used in the Didhiti that he was a bit too highly conscious of his own powers. Cf.

> विदुषां निवहैर्यदेकमत्याट् यद्दुष्टं यद्य दुष्टम् । मयि जहवति कट्पनाधिनाधे रघुनाधे मनुतां तदन्यर्थय ॥ (End of अनुमानदीधिति)

He declares that his commentary on Chintamagi embodied the essence of various Sastras (सार निर्णाय निरित्सनद्वाणी) drawn out by study (श्रप्यम) and contemplation (भाषना)

Rayhun itha had unquestionable a real gift for poetical expression rare among the logicians of the Middle Ages. The well known verse

कान्येषु केमस्राधियो प्रयमेव नान्ये तर्वेषु वर्षश्चिषया वयमेय नान्ये । तन्त्रयु पान्त्रतिथेगे ययमेव नान्ये इन्हापु स्वतिथिया ययमेव नान्ये ॥

and B Siddhanta rahasyam

Mathurānātha was a Varrava in his personal creed His father Šri R ima Tarkālankara was a great pandit and seems to have been the author of a voluminous Commentary on some work in Ny 1916-1874 Probably the commentary was on Chintamani, and it is interesting to find the son controverting the views of the father. In the Govt Sanskirt Library, Benares, there is a Ms of Sri Rams's Commentary, called Tippaņi, on Raghunatha's Atmatattvavivekadidhiti

IX -BHAVÁNANDA SIDDHÁNTAVÁGIŚA

Bhavananda was one of the ablest representatives of the Nadia School of Thought, and though his works have not enjoyed the same celebrity in Bengal as they have done in the South it does not detract in the slightest degree from their ment. It is a strange fact of which no true historical explanation can yet be rendered that among the commentaries on Bhavananda none has proceeded from Bengal. It seems that soon after its publication the book, was subjected to a severe criticism in certain quarterst, and that in conse

e Evidently the verse is flista here and has to be interpreted in a double sense, being at once applicable to the great Rāma Chandra and Sri Rama, Mathura nathas father As explained in reference to the second interpretation, the word न्यायान्य्रीय ought to mean a book prepared by Śri Rama अधिल्यसपित some jagir secured and नियुत्तन the names of three contemporary scholars named 'Bhuvana vanquished in debate, by whom his glorus were sung I donot 'know whether all this is not to be rejected as mere conjecture End of Mathurà's Commentary on Tattva chintamani

[†] Oppert (2025, 5278, II, 0408) mentions a treatise of this kind by one Vajratanka Sastrin. But it is a comparatively recent production Vajratanka seems to have written also a commentary

quence of this the study of the work was left altogether uncared for in the country of its birth. Thanks are due, however, to Mahādeva Puntamkar for reviving an interest in the study of this valuable but much neglected work and for popularising it through his commentances.

Bhavananda left behind him two worthy pupils in Jagnātis and Rachavendraf, both of whom distinguished themselves as scholars and made valuable contributions to philosophy and literature

The name of Bhavānanda's guru is not known Tradition makes Bhavānanda Mathurānatha's disciple, which on chronological grounds is admissible, but may it not be that he was Raghunatha's direct pipil? The following extract taken from his commentary on Anumanadidhiti, where Raghunatha is referred to as 'Bhanjichārya', would seem to point to this conclusion.

नीसविशिष्टधूमेऽपि विशेष्यत्वस्योषाधेः सत्येन निष्ठपाधित्व साधनव्यापनत्वादिति विशेष्यत्वपाटस्यामामाणिकत्वात् तटुपेद्वितं

क्षपीवानसुद्धिक वाष्यावशेषकं भवतन्त्रसिद्धान्तवार्गास छवे । भवे नेपार्व देवेपनावातिविधावनन्तरवारासवर्ग विभीते ॥

on Bhavinandi, called Bhavinandi prakisiki (side Hultzsch, No 1462, II, pp. 1378)

^{&#}x27; Cl Mah dana puncent remarks tomads the beginning of his commentary on Beasinstoli (Anumina) असार्गण्य मिद्राल्य, बार्यासायाची पूर्ण सचित्रः (?) पण्डितीर्राति : बर्दुस्मवितं हृष्याभासरूर सदुसाराओं समाधार वण् ॥

⁺ Rightwendra was much loved by his lutor. So says Chita' jira in the Vidianimodatarai gril.

महाचार्यशिरोमाशिभिरित । I hold, therefore, pending further evidence to the contrary, that Bhavānanda was Raghunātha's junior pupil and that on the latter's death or probably on his retirement through the infirmities of age, when teaching was impossible, Bhavānanda completed his studies with Mathurānātha And this would be in Leeping with Bhavānanda's own statement in his commentary on the Didhiti

नमस्हत्य गुरून सर्वोन निगृहं मखिदीधितै। श्रीभवानन्द्सिद्धान्तवागीशेन प्रकारयते॥ Here 15 a list of works written by Bhayānanda

A. Commentaries on

- (a) Gangesa's
 - 1 Tattvachintamapi
- (b) Pakşadhara's
 - । Tattvachintāmaņyaloka (= आलोकसारमञ्जरी)
- (c) Raghunātha's
 - 1 Tattvachintämanididhiti (=द्यितिगृदार्थ प्रकाशिका)

В

- (a) श्रव्दार्थसारमञ्जरी
- (b) कारकचक
- (c) दशलकारसारमञ्जरी

X — GUNANANDA VIDYĀVĀGISA BHAŢŢACHĀRYA Guṇananda, better known as Vidyāvāgida Bhaṭṭāchārja, was a pupil of Madhusūdana and wrote a large number of

commentaries, viz on (a) Udayana's

1 Nyāyakusumāñjaliprakaraņa (=न्यायकुसुमाझलि-ियवेफ)* The work is called तार्यययिवेका in the Ms of the Govt Sanskrit Library, Benares

This is a commentary on the whole of Kusumai jali, and not on the metrical portion of it only, as noted by Mr. Chakra varti (J. A. S. B., 1915, p. 279)

- (b) Vardhamana s
 - ा Guna Kıranavalıptakasa (≃गुण्विमृतिविवेक ०० तारपर्यसन्दर्भ)
- (c) Paksadhara s
 - 1 Tattvachintamanyaloka, Śabda section (=श्रद्धालोक-चित्रेक), and
- (d) Raghunatha's
 - । Anumana Didhiti (= विवेक)
 - n Nyayahlavatiprakasadidhiti (= विवेक)
- m Atmatattvavivekadidhiti (= विवेफ)
- and w Gunakiranavaliprakasadidhiti This work is identical with (b) 1

His time is unknown, but it may be surmised that he lived about the end of the 16th century. This is proved by the fact that there exists in the India Office Library a Ms of its Gunarivituries with 1534 Saka (वेद्यावाशिष्ट्रेट शक्तः) or 1612 A D *as the date of its transcription Besides, as his tutor cannot be identical with the famous author of the Advantasiddhi the time here proposed for him would not seem incompatible. The fact that he was criticised by the Jain Logician Yasonijajagan fin the latter s Njāya khandana khāda presents no chronologi al difficulty.

NI —RAMA RUDRA TARKAN ÁGIŚA

Rudra to be distinguished from another and more famous Rudra surnamed Ayaya Vachaspati; was grandson

- 1 1608-1688 A D
- Aufrecht (Cat. Cat., Vol. I, pp 528—529) has erroneously placed the works of the two Rudras under the suegle name of Rudra Ny ya Vechaspati and made him the grandson of Rudra Ny ya Vechaspati and made him the grandson of Rudra Vechaspatis, grandfather appears correctly as Vidyavachaspati

Not 1622 A D as stated by Dr Vidyabh sana in his Indian Logic p 468

of Bhavananda Siddhintavigişa on whose Kirakachakra he wrote a Commentary. In the Colophon he distinctly attributes this work to his grandlather (पितामह)

Rudra wrote another Commentary on the Siddh'inta muklāvali, where he calls his father (तात) Sri R'ima (श्री रामधीरेंग्र). Madhusadana may have been the name of his Guru Ind Off, p 674

XII - RĀMARHADRA SĀRVABHAUMA

Very little is known about Ramabhadra's parentage or personal history except that he was the guru of the famous Jagadisa Tarkalanhara. In the introduction to many of his commentaries (e.g. on the Padarthatattvanirūpana) he calls himself the son of one Chūdamani whom Hall identifies with the Tarkisachādamani Raghunāthat

He was the author of-

A. Commentaries on

- (a) Gotama a
 - 1 Nyāya Sutras This commentary is of the nature of a gloss and is generally known by the name = ন্যাব্দেশ্বা Copies of this work are very rare I examined a complete Ms of the with Pandit Mukunda Śastri of Benares, which has suice been acquired for the Sanskrit College Library Benares

Cf Jagadiśa in Śabdasaktiprakaśika — इति पुनन्यांवरहस्ये इस्सङ्गुरुवरणाः ।

[†] Mr Chakravarti (J A S B, 1915, p 281) and Dr Vidya hi wana (Ind Logic, p 468) wrongly make Ramabhadra the son of Bhayanatha and Bhyani. The error is apparently due to an original confusion on the part of Aufrecht (Cat Cat, 1, p 517) and Stein (p 148).

(b) Udayanas

- r husumāñjali kirikas* This was once a very popular commentary and shared the reputation of Handasa's work in Bengal
- u Guna Luaparah (गुल्यस्यम्)

(c) Raghunătha s

- 1 Padarthatottvavvechana (PATE) in this work Rimabhadra refers to the view of his father (p. 112) and of his grandfather (p. 111)
- . It may be observed that Ramabhadra was not the author of the entire commentary which in Bengal passes under his name The earl or part of the work, where the author names his parents as Bhayanatha and Bhayan and where he remarks that in interpreting the text he has closely followed the instructions received from his father ('तताऽधिका पितुन्यास्थामास्यातुमयम्थम '), is strongly reminiscent of Saukara Misra and must have proceeded from his pen. And as a matter of fact, for this very reason. the whole commentary is ascribed to Sankara Misra in Mithila To me, however it seems that the commentary known as Amoda in Mithia (noticed by Aufrecht in Oxf Cat p 243 and by Dr Iba in his perface to V divinoda) and as Ramabhadri in Bengal (notified in Mitra, No 525) was not the work of a single author but the rout production of Sankara and Ramabhadra it had been commenced by Saukara Misra but for some reason or other left incomplete by him and was subsequently completed by Rama bhadra Saryabhauma. This will explain the origin of the erro neous statement in regard to the parentage of Ramabhadra That this is not a mere supposition will be clear from an actual entry in the following extract from the commentary grand शहरमिश्रकत तत सार्वभीरमायम् (Fol 6a 25 of a very old Ms. in possession of Pandit Harihar Sastri of Benares) But the full text of Saukara Misras ' Imoda is also available, a copy of which exists in the Sanskrit College Library Benares See ante (Vol III.

- and B (a) सिदान्तरहस्यम् This work is little known but it is referred to in (c) i (Reprint from the Pandit p. 96) and therefore preceded it.
 - (b) सिद्धान्तसार (Burnell, p 121 a).
 - and (c) सुवर्षतेजसत्त्वाव (Hultzsch, No 1404, 11. p 133) In this work Rāmubhadra refers the current notion of the logicians regarding the igneous character of gold

XIII.—JAGADIŠA TARKĀLANKĀRA

Among the disciples of Bhavānanda none was so eminent as the famous Jagadiśa who, with Mathurānātha and Gadādhara, forms the small band of post Didhitian Logici ins in Bengal Jagadiśa is said to have been a descendant of Sanātana Miśra, the father-in-law of Chaitanja Deva and lived probably in the second quarter of the seventeenth century.*

From Jagadisa's statement in the Nyāyarahasya it appears
that he was also the pupil of Rāmabhadra Sārvabhauma

He was the third son of Yadava chandra Vidyāvāgīsa and had five brothers. He had two sons, i. e. Raghunatha, the

p 147) The late Mahamahopadhyaya Mahesa Chandra Nyayaratna (in his 'Brief Notes on the Modern Nyaya System of Philosophy and its technical terms', p 5) ascribed this commentary on the Kusumanjalikankis to one Ramabhadra Siddhantavagisa, whose name is associated by popular tradition with the establishment of the image of Pola-ma at Nadia and whom he takes to be the earliest exponent of Nyaya in Bengal (either than Vasudeva Sarvabhauma). But this is evidently without any foundation in fact.

*A Ms of Jagadisa's Kavya prakšša rahvsya was copied by one of his pupils in Śaka 1599 (= 1677 A D)

author of Sānkhjatattvavilasa, and Rudreśvara, the father of Rāmabhadra Siddhāntavāgīva

Jagadisa was the author of

 - (b) तकोंग्रत

XIV — RÌGHAVENDRA BHATTÀCHÀRYA SATÄVADHÁNA

Next to Jagadisa the most remarkable person among Bhayānanda's disciples was Rāghavendra Bhaṭṭācharya. In the first chapter of Vidvanmodatarangup, a work of unique interest by Chirañjira Bhaṭācharya, the author, who calls himself Rāghava s son, gives a short but interesting account of his own family. He claims descent from a native of Rāghapur, who is said to have been a high authonity on ceremonies relating to sacrifice and it is related that once by virtue of his extraordinary powers of sacrifice he was able to ensure the safety of the county of Gauda from what is naively described as the inroads of rākṣasas. He belonged to Kāṣṣṭaṣ gotra and his descendants ranked in Gauda as the noblest in social scale. His descendant in the Sth remove

was Kāsinātha Sīmudrikīchārya, a great palmist, physiognomist and fortune teller. He had three sons, Rājendra, Rāghavendra and Mahesa

Rīghavendra was certainly the most accomplished of the three brothers. He obtained the title of Bhaṭṭēchārya Satāwadhāna while he was jet a boy of only 16 years of age He read various Sastras in the tol of Bhavīnanda Siddhāntavāgifs, and became in course of time a past master in the Science of Dialectics and a great controversialist. Rāghavendra was a poet of extraordmary powers, and his Ślokaśati will ever remain a monument of his marvellous skill in this art. Chiranjiva quotes the following tributary verses written by two different poets in praise of Rāghavendra's wonderful gifts.

One poet says -

- (1) श्रहं हरिहरः सिङ्ठे रविलम्य सरस्वती । साज्ञाच्छ्रतायधानस्त्यमयतीर्णा सरस्वती ॥ The other savs
 - (2) पुष्ठपादरणी साज्ञादवतीर्णा सरस्रती ।

जितः शतायधानते विष्णुनापि न जिप्सुना ॥ All this goes to shew that Raghavendra was held in great esteem by his contemporaries Bhavananda was struck with his genius

श्रपीयानमुहिर्य चाध्यापकाऽयं भवानन्द्सिद्धान्तवागीश ऊचे । श्रय कोऽपि देवे।ऽनवद्यातिविद्याचमत्वारधारामपरां विभति ॥

Rāghavendra is credited with three works,—none however on Nyāya,—by his son, viz ऋतेकराती, मन्त्रार्थदीए and रामप्रकाश

XV — RAMABHADRA SIDDHANTAVAGISA

Rāmabhadra Siddhāntavāgiša, a resident of Navadvīpa, is said to have been the son of Rudresvara and grandson of

मामुद्रिनेचौऽथ समुद्रकरप. सामुद्रिकाचार्य इति प्रसिद्धिम् ।
 लेभे रुणामास्त्रतिदश्च नेन एळ बद्रन्मृतमविष्यदादि ॥

Jagadisa.' He was the pupil of lus grandsather. Cf. the verse I at the beginning of lus commentary, called মুটামিনা (Mutta 3367 or মুটামিনা), the only work passing under his name on Jagadisa's Sabdasaktiprakāsikā.

> गुरुमिय गुरुमिह् नत्या तत्कृतशब्दगक्तिप्रकाणिकायाम् । श्रोरामभद्दसुकृती कुरते टीकां सुदे सुधियः॥

Skt. Coll Catl. p. 265, No 460

XVI.—GAURĪKĀN TA SĀRVABHAUM A BHATTACHĀRVA

Among the Commentators of Tarkabhaya Gaurikania's name occupies perhaps a unique position, both on account of the exhaustive treatment of the topics raised in the text as well as for its great bulk. His Commentary or Tarkabhaya's ecettamly his best production, and perhaps the most thorough work of its land existing in the literature.

As to his time it may be roughly fixed in this may

In the work just mentioned Gaurikanta alludes very frequently to the views of Belisbhadra and Gouridhana and vehemently denounces them as erron-ous? Gouridhana's age has been ascertained to be the 16th century, which therefore furnishes the upper limit of Gaurikanta's life period,

This Commentary is wrongly ascribed to Rimabhadra Sirvabhauma in the Preface (p 2) to Padarthatattvaniripana (V P. Dube's Edition)

the other or lower limit, however, is afforded by the age of Mādhava Deva (i. e. the end of 17th century) who quotes and enticless the opinion of Gaurikānta in his own तर्देशायास्यस्य पि । Hence it may be concluded with tolerable certainty that. Gaurikānta lived in the early part of the 17th century.

Gaurikānta's works are:

A Commentaries on

- (a) Praśastapāda's Padārthadharma Sadagraha.
 This work, unknown to Aufrecht, I find
 mentioned under the title of ইয়িবিকনাথেবিৰয়ে in his Bhāvārthadipikā (Benares
 College Ms. 156, fol. 3b).
- (b) Kesava Misra's
 - i. Tarkabhāsā (=भावार्धदीपिका). This work is also called विवरण in the colophon of the chapter of the Benares College Ms. 156, fol. 25b.

Commenting on the nature of anubhava in his Commentary on the Tarkabhāṣā Gaurikānta quotes the following verse and says that it occurs in the text in some Mss;

> संचिद् भगवती देवी स्मृत्यनुभववेदिका । श्रनुभृतिः स्मृतेरन्या स्मृतिः संस्कारमात्रजा ॥

Fol. 9b.

- (c) Raghunātha's
 - i. Tattva Chintāmanudīdhiti.
 This work, too, is not mentioned in Aufrecht, but is referred to as মাণ্টাৰ্থাখিৱি বিবাৰন (Ms 156, fol. 22b) in connection with the discussion of মুব্যাম্বাৰ্থ.
- (d) Annam Bhatta's
 - i. Tarkasangraha

(a) सदयकिम्कायली

Gaurikānta's reference to Sarvabhauma (Benares College Ms 163, fol 138b) in conjunction with Didhiblāta must be understood as standing for the great Vasudeva Sarvabhauma, and not for Rāma bhadta or Kṛṇṇdāsa It is not jet known whether Gaurikānta was a poet, but be describes himself as ফবিবারিক্রেকারবার্নী in the colophon of the Pratyakas tection of his Bhārartha dipihā (Benares College Ms 156)

XVII -HARIRĀMA TARKAVĀGĪŠA • (1625 A D)

Hornama's reputation as an eminent Naijāyika of the Nadia school does not rest so much upon his own productions, as upon his relation as tutor to the great Gadādhara Bhanjāchāya. But there is no doubt that he was the recognised head of the then Naijīyika community of Naiddripa. It is said that he used to get the highest reward in all public assemblies, a distinction which has invariably been confined to the scholar occupying the fore most rank at Nadia for crudition and controversial cloquence. Of the long list of his works the greater part are already forgotten, except one or two hitle pieces which are sometimes used by inquisitive students. His works were numer own and strikingly original. Here are some names.

Hamama died a ripe old man Gadadhara* and Raghudeva† were his principal students

Hanrāma quotes among other works, from one Nyāya Kaustubha But i s evident that this can not have been the work of the famous Mahādeva Punntamkar who was his successor In the Govt Sanskrit Library Benares, there is a Ms of Raghudeva's Commentary on the Kusumānjali Karikas transcribed by Mahādeva in his own hand As Raghudeva was Hanrāma's pupil Mahādeva could not have lived before the latter

^{*} Hall, p 55

[†] Weber, I p 204 (Ms 685, Dravyasarasangraha of Raghudeva) Peterson, VI pp 15-16

As a teacher of Raghudeva Harmann may be assigned to the first quarter of the 17th century.

XVIII,-JAYARAMA NYÄYAPAÑCHANANA

From the introductory verse (No. 1) of his commentary on the Didhit: it appears that Jayarama was the pupil of one Rāmahhadra Bhaṭtācharya.* But who this Rāmahhadra might have been there is no means of ascertaining. Mr Chaktavarti takes him as the abthor of Nyāyarahasyam which is likely, but it seems to me more probable that he was the same as the pupil of Jagadisa. Jayarāma's time can be determined with exactness and he may be assigned to the third and fourth quarters of the 17th century. For there is evidence to show that he was living at Benares in Samvat 1714 or 1657 A D t and composed one of his works in Sam 1750 or 1693 A D.

He is known to have been the author of the following works

A. Commentaries on

- (a) Gautamas
 - s Nyāya Sutras (न्यायसिद्धान्तमाला) The work contains the following references

 - 11. Tattvachintāmani didhiti (=गृहार्थविद्योत or दीधितियवृति).

в.

(a) ঘর্থেনালা or ঘর্থেনিশিনালা or হাত্রথিনালা ়া It is a valuable treatise, quite original in its treatment. The author declares his object in writing this tract as purely critical:

Vidyabhusana, Indian Logic, p 478.

[†] अधिकं कारिकाच्याच्यायासनुसन्धेयम् (fol. 74b⁴ of Ms. 168 belonging to Govt. Sanskrit Library, Benares). Three Mss of this work exist in the Govt. Sanskrit Library, Benares

[‡] Śabdarthamala is not a distinct work, as Mr. Chakravarti (J. A. S. B., 1915, p. 283) and Dr. Vidyabhüşana (Ind.

भाष्याधुकिषु होनयुक्तिषु रति, प्रेत्तावतां प्रेत्यते हायार्थे विहिताषि वृक्तिरहिता वाली कविद्यन्तते । मध्येय जयराम पर्य विदुत्ते स्ववृक्तिमुक्ताक्तीः प्रथ्यक्तं वितनिति कोषितुसुदै शब्दार्थमालामिमाम् ॥

From the above it appears that the work was intended to form a hind of supplement to the Prasastapada bhayam and the Kranavali

- (b) अन्यथायातिविचार
- (c) लघुसश्चिकर्पवाद
- (d) न्यायमाखा

XÍX.-GADÁDHARA BHATTÁCHARYA (1650 A D)

Gadadhara, son of Jivacharya and a younger contemporary of Jigadies, ass a Varendra Brahman, organily of Lakymichapar in the distinct of Pahas. He came to Nadia for prosecution of studies, and being admitted to the rd of Hanrama Tarkavagiés, the greatest living professor of Nyjayasistia, he was soon able through diligence and steady application to win for himself the favour of his tutor and rise into prominence. It is said that owing to Hanrama's death before completion of his studies Gadadhara could not secure any title of distinction.

Logic, p. 478) hold but only another name of the Pad rthamali. The author himself employs the two names indifferently for this work. Thus in the second benedictory verse at the beginning (arthurer aisers &c.) and in the second verse at the end of the Dravya section (arthurer off sin ates &c.) the name Padsithamali is used, but in verse 1 at the end of the Dravya section the work is referred to under the name of Sabdarthamali is very injusticinity.

Navada ipamahima p 85. In the copy of the India Office Ms. of Gadidharas Anuminadidhituppani, he is called nigrasiquere mixinita nigra warei (Ind. Off. Cat. p 607).

It was Harırama's dying wish that on his death Gadadhara should succeed him to professorship in his fol, as otherwise its reputation would not be maintained Gadadhara readily consented to comply with this last wish of his tutor, and began to teach, but he soon found to his great disappointment that no students cared to come up to him for study, and even the old batch deserted him one by one His absence of a "conventional title" of ment was a bar to his real claim to tutorship. However, Gadadhara was not a man to allow his spirits to be damped by this He left his tutor's place, and founded a school of his own in a delightful little garden on the wayside of the mainroad leading to the Ganges Here in the cooling shades of the trees he made his abode. In the absence of any students coming to hear him he would deliver his lectures before the creepers and plants of flowers Pandits coming to the garden for plucking flowers and passing by it on their way to the Ganges for bathing would often pause to hear him and found his discourses as learned as attractive. Gadadhara's fame thus spread around within a remarkably short period and drew towards him flocks of students from various quariers".

He was the author of-

B.

(a) ब्रह्मनिर्णय

and (b) 64 short treatises, known as Vädärthas, dealin each with a separate topic of the new school o Nyaya Philosophy, such as १ विषयतायाद, ॥ शक्तिवाद in मुक्तियाद, १० व्युत्पचियाद, ९ प्राह्मयवाद, २०। रज्ञ केशयाद, २०॥ क्षारणतायाद, २०॥ अनुमितिमानसवाद, १३ नव्यमतवाद, २४ विधिस्यक्षपवाद, ६८ &c.

Gadādhara was a Vaisiava, being a votary of th Vṛṇdāvana form of Śri Kṛṇna (नन्दतन्त्र), but he did no fail to pay due reverence to the other forms of the Divinity Cf his benediction in the Chintāmanididhiti (Anumāna) wher he myokes the blessings of Durga (शिरोन्द्र दृष्ट्ता).

His principal student was Jayarāma Tarkālankāt (S V)

XX.-RAGHUDEVA NYĀYĀLANKĀRA (1650 A.D.)

Raghudeva was also Haurāma's disciple, and plainī reiers to him as his guru in Dravyasansangraha (Weber 1, p 204)*. He is said to have been Ehavānanda's descen dant He wrote the following works

Bodas to his Introduction to Tarkasangraha, p. 45 and Pt. V. P. Dube in the preface of his edition of Padorthitativaminipus, p. 2, wringly mike Rightidesa. Mathuranathi's disciple. The mistike wis evidently occasioned by the fact of both. Mathurs within and Hans improvement a common title (siz. Tarkasania). But away from the above extract which throws light on the whol questive the mustake will also be apparent when it is known the providence of the state of the state

In Nañwada (Oxf., p. 245, Ms. 617) he names his gun Tarkavigisvara which must be understood, in conjunction with the above statement as applying definitely to Harrama

- A Commentaries on
 - (a) Kanāda Sūtras
 - (b) Udayana s
 - Nyaya Kusuma ijali Karikas*
 - (c) Gangesas
 - Tattva Chintamani This commentary known as गुद्धार्थदीपिका, or popularly by the name of the author as Raghudevi
 - (d) Raghunatha s
 - Padartha tattva nirupana
 - Tattva Chintamani didhiti
 - Akhvata vada 111
- R (a) विषयताविचार । Raghudeva refers to this in his commentary on Padarthatartvanirupana (Pandit Ed, p 78)
 - (b) द्रव्यसारसग्रह, (c) निरुक्तिप्रकाश
- and (d) a certain number of tracts, such as (1) चित्राप्रवेशिष्ट्य वाधविचार, (n) अनुमितिपरामशैविचार, (m) सामग्रीवाद, (iv) प्रतियोगिज्ञानकारणताचित्रार &c &c

Raghudeva is sometimes identified with the new Kanada, but this does not seem to be correct. For we know that Kanadas s guru was one Chad imani, as mentioned in his own Bhisiratna and not Haririma or even Jagadisa (S V Kanāda)

remove (N Mahima p 80) and that the latter was Mathuranatha s direct pup! But the verses at the end of the Nansada (and सुक्त दुरुन या बन् हिन्त्रित अस्पित मया। तन् मर्ग जगदारास्य प्रीत्वर्ध मिन्पनिन्दितम) seem to show that he read also with lanadi a Or perhaps the word Jagadisa means God and nothing more

"There sa Ms of the work dated Sar 1739 (= 1682 A D) in the Govt Sanskrit Library Benares It was transcribed by the great Na yāyika Mahādeva Puntamkar

On the basis of this supposed identity between Raghudeva & Kanada and of the fact that Sankara Mifra pays obesance to kanada in the Upatkara, Rodas makes Sankara pupil of Raghudeva

Raghudeva hved at Benares Mm Haraprasad Sastra, in his Report on Sanskrit Mas (1905 7—1910 11, p 6), assigns him to the beginning of the 18th Century But this date is certainly wrong. In the Gott Sanskrit College Labrary, Benares, there is a manuscript of Ragbudeva's commentary on the Kusumañjah harikas transcribed by Mahadeva Puntamkar in Sam 1739 or 1682 A D Ragbudeva was therefore of an earlier date. The 'Decision' of Benares Pandits referred to above contains the signature of Raghudeva This 'Decision' is deted Saniat 1714 (जुलसमान्दे) and Saka 1379 (नव्योगस्य मित्रामिक्स), that is 1657 A, D which is consequently the event date of Raghudeva

XXI ~ JAYARAMA TARKALANKARA (1675 A D)

Jayarama's father Jayadeva was the court pandit of Putia in the District of Raysbahee, and had been originally a native of Pabna. In old age he retired to Navadija where he settled permanently. Jayarama is said to have received his education in the rel of Gadadhara and wrote a commentary, the only work by him yet known to us, on his teacher's Saktivada*

His most famous pupil was Vistanatha Panchanana, the author of Bhasāparichcheda and Muktavalit

[&]quot;Hall, however, assigns it to a pupil of Japatima (p. 56) + The line of Vissanathas teachers is given thus in the popular saying extract, again and for one was in which gives us the order—Humann Tarcavity is—G distinct Hautteburya—Japatiman Tarkitablara—Vistanatha Pauchinana

XXII.—VIŚVANATHA NYĀYASIDDHĀNTA. PANCHANANA (1654)

Of all the authors of Nyava tracts whose aim has been to bring the subject within easy reach none has achieved a greater success than Visyanatha, the eldest son of Vidyanivasa, of Nadia. 4 His Bhasaparichcheda with his own gloss upon et named Nyāya Siddhānta Muktāvali † occupies even now the foremost position among the manuals on Nyāya Vaisesika philosophy, and for a learned and lucid interpretation of the original sutras of Gotama no better work is available than his Nyavasotravrtti. His other works are less known but equally interesting. As to religious belief he was a Vaisnaya and passed the last years of his life in retirement and devotion at Brindayan. It was here that he composed, in 1576 Saka or 1654 A. D., his learned commentaries on Nyāya Satra in pursuance of Siromani's interpretation. He belonged to the second and third quarters of the 17th Century, and was the author of the following books:

A Glosses on

(a) Gotama's

ı, N. Sutras (:যাযম্মনুধি), composed in 1654.

[•] His younger brothers were Nitayana and his father was the son of the younger brother of the great Vasudeva Sarvabhauma (p. 119) and is said to have been highly honolured by Raja Mansingh of Amber and defeated in a public ness milly at the Court of Todainall the great scholar Nursiana, Uharin of Heaners.

[†] This work reminds one of a less known but similarly noned treatise on Vedanta, viz. Vedaria Siedl nto Muktavali by Prakosomanda Svimi Prakosomanda Svimi Prakosomanda Svimi prakosomanda svimi prakosomanda svimi arber author and it was his work which appears to have inspired the title of Visyanatha's gloss on his own Karikas.

- (b) Raghunātha Siromani s
 - 1 Padartha fath annupanam
- (c) His own
 - 1 Bhasapanchebheda a collection of couplets summarising the doctrires of the Varsejika philosophy. The work purports to have been written for the use of the authors nephew (?)
 Rajiva. There is a copy of this work belonging to Nrisinha Dilvita, dated 1719 Sam or 1662 A D.

В

leaves at the end. In the Colophon, which is happily preserved, the author is styled Mahamahopadhyaya

YXVII — ŚRIKRISHNA. NYAYAVAGIŚA BHATTA-CHĀRYA

Sri Kṛṇa was the son of Govinds Nyāyālahkīra and was the author of a Commentary on the Nyāya Siddhānta mañjari, called भावदोसिका । This Commentary was written, as the author himself intimates in the Colophon, at the instance of one Rājā Bhāva Simha, son of Satruśalya * No clue is given as to the identity of these kingst

The author of Navadvipa Mahimā says (p. 88), without stating any authority, that this Govinda was the descendant of the great Vāsudeva Sārvabhauma and that he was the leading pandit at the Court of Nadia. It is also said that he received 1000 lighar of rent free land in the village of Adabāndi.

 I inspected a complete, and apparently very old, Ms of this work in the family collection of Babu Dik it; Jale of Benares, where on fol 139 the following colophon was found ति धीगोविन-इन्यायार अस्मित्राच्यां अपन्याय मागोसमहाचार्य विद-वितायां न्यायसिक्दान्तमाइसीदीहाराच्या सन्दरण्ड समाप्तः। समुसम्बदन्यन्य भागसिकप्रप्राप्ते, 1 आहत्या रिपोर्ग प्रत्यो भागसिक्दमित्रीस्य ।

May this Satrusalya be identical with the hero of the poem, Satrusalya Charita by one Visyanatha, son of Narojana, which Peterson notices (3 342) 2

े † Raman rayana was the acknowledged bead of the Pandit Community of Nadon towards the end of the 18th Century Among his other pupils was the famous चुन्न सामनार or Ramanaths 'the nuld —a nuck name and for his dwelling on the outskirts of the village—whose name has become a familiar expression for plane living and high thinking

XXIV.—RAMA KRŞNA BHATTACHARYA '

In introducing his commentary on Rama Krsoa's Terkamrta Krsna Kanta Vidyavagisa gives a brief but interesting outline of the early history of the author's line. He says that in the village of Kotaliparah, which as we know even now maintains a position of intellectual eminence in Bengal, there once lived a Brahmin, named Govinda, who was well versed in the Kalapa system of Grammar and in Smrti and used to teach these subjects to his pupils. He had a son, whose name does not appear in the work, and three grandsons viz Durgāprasāda, Chandidāsa and Devidasa. Devidasa was the youngest and apparently the most intelligent of the group. He had a scholarly disposition. Having finished his education at home, he went out to Nadia, then the centre of Culture in Eastern India, with the idea of prosecuting higher studies in philosophy. He sat for a long. time at the feet of the famous logician Bhavananda Siddhantavagusa and became one of his most favourite pupils. said that even on the first interview Bhayananda had been so much struck with his scholarship that he had predicted about his future greatness. He then married and went to Benares, where he became known for his learning under the title of "Vidyabhusana". It was here that his son, Rāmakrson was born. ; **

About Rämkrana himself Kranakanta says little, excepting that he was thoroughly conversant with all the Sastras, was a great pandit and won wide celebrity. Besides firs aduled that on the vectors of this marriage Devidas come to Patali, and settled there as teacher till the end of his life.

^{. *} Krehnkutta quotes the old popular saying which speaks of 6 (or 7) great contemporary scholars, viz. Jayadeva and Rudranatha at Nadia, Raminatha at Pārvasthalī, three Bhūṣanis at Pājalī ond Rāma-āma at Taḍiṭa.

Whether Rumakrica returned to Bengal and settled at Nadia or stayed on a Benares, is not known. But it is ceftain that his influence travelled far and wide, and was not confined to provincial limits.

Kusyakanta, Rāma Kusea's great grandson, having lived in 1801 A. D. Rāma Krue's time may be assigned with some probability to the last quarter of the 17th Century.

He wrote

A. Commentaries on

XXV.-MAHADEVA BHATTACHARYA.

There exists in the Government Sansint Library, Benarcs, a MS of a work named fintmiller which on reamination is found to be a gloss on the Nyāya Satras of Gotoms, attributed in the Colophont to one

साके रामाश्चित्वशितविधानिते (lind Off Cat. p 654, Ms

No. 814) १ इति भहावार्यभीमहादेगगृती मिलभाषिच्यां न्यायपृत्ती हिर्गायमाहितस् । वि. 260

This clear statement of the author-hip should at once dispet the error of Aufrech (Cat. I., 137) who needed the work, apparently on the similarity of curies, to Mahdard Pottimists. The title Ibanish rya is a cretism indication of the author's Benghi descent. The Ny 12 S for Vita is and to have been undertaken at the request of one Someware Bhatia.

Mahādeva Bhaṭṭacharya He was the son of Vāgīs varacarya and Bhaṭṭachar From evidences of style and the method of interpretation I feel strongly inclined to identify this writer with the author of a similar gloss on the Sar khya Sutras (Sankhyavrittisara) If this identification be correct Mahadeva had been the pupil of one Svayampra kaša Tirtha who conferred on him the title of 'Vedantin' *

His time falls in the last quarter of the 17th Century At the end of his Commentar, on विश्वुसहस्रनाम he gives Samvat 1750 (खवासमुनिभूमाने) or 1693 A D as the date of its composition

महादेवेाऽकराहु ज्याप्या चिम्लानीमसहस्रगाम् । खवालमुनिभूमाने वत्सरे श्रीमुखाभिधे ॥५५

Weber, Vol II, p 113 [Cf Garbe's Sankhya Philosophie, p 78 and Sankhya und Yoga (Grundriss Series), p 9]

XXVI —RAMACHANDRA SIDDHANTAVÄGIŠA

I noticed a Ms of Rama Chandra's Commentary on the Chintamagndishir Pratyaksa ecoton (রেবজুমাজিরীতিরি-বিষ্মার) in the family Library of Babu Dikuta Jade of Benares The Ms was incomplete containing only a few

See

(i) the Colophon at the end of Berlin MS (636) of his Sankhyavritisara Chap I

इति स्वयंप्रकाशाधाङ्गिष्ट्रश्यनदान्तिसत्पद्ग महादृनेतोग्नीते साद्ध्यप्रस्थि सार प्रः अध्याय ।

Weber, p 185 and (1) the beginning of Berlin MS (15°4) of his Commentary on Vi nusahasranama—

> स्वयेष्रसाराताधाडविद्यञ्घरेदानितमस्यद् । महाद्वरा र्थमाच्छे विश्वणामसहस्ययः॥

> > Weber, Vol II p 113

leaves at the end. In the Colophon, which is happily preserved, the author is styled Mahāmahopadhyāya

VYVII —ŚRIKRISHNA. NYAYAVAGIŚA BHATTA CHÂRYA

Sri Kissa was the son of Govinda Nyayalankara and was the author of a Commentary on the Nyaya Siddhānta mangari, called भावतीरिका । This Commentary was written, as the author himself intimates in the Colophon, at the instance of one Raja Bhāva Simha, son of Satrusalya No clue is given as to the identity of these kingst

The author of Navadvipa Mahima says (p 88), without stating any authority, that this Govinda was the descendant of the great Vāsudeva Sārvabhauma and that he was the leading pandh at the Court of Nadia. It is also said that he received 1000 lights of rent free land in the village of Adabāndi.

I inspected a complete, and upparently very old, Ms of this work in the family collection of Habo Dik its Jale of Benares, where on fol 139 the following colophon was found to stiffic क्रियोगीजिन्द्रस्वार्थ कारमहायार्थास्य क्रियोगीजिन्द्रस्वार्थं कारमहायार्थं स्वत्रस्व मामासः । राष्ट्रप्रस्वयन्त्रस्व सार्वार्थं कारमहायार्थं सार्वे स्वत्रस्व मामासः । राष्ट्रप्रस्वयनन्त्रस्य सार्वार्थं कारमहायार्थं सार्वे सा

May this Satrucalya be identical with the hero of the poem, Satrucalya Chirita by one Visvanitha, son of Narayana which Peterson notices (3 142)?

[†] Rantan riyana was the acknowledged head of the Pandat Community of Nadri towards the end of the 18th Century Among his other pupils was the famous 374 THATRI or Ramanatha the wild —a nick name wan for his dwelling on the outskirts of the village—whose name has become a familiar expression for plain living and high thinking

(162)

XXVIII — KRŞNA KĀNTA VIDYĀVĀGIŠA

Krisna Kanta, the son of Kalicharana Nyāyālankāra and Tātnī Devi and a pupil of Rāmanārāyana Tarkapanchānanat was a Brahmin of the Vaidic class He flourished towards the end of 18th and beginning of 19th Century—during the reign of Maharajā Girisachandra of Krishnagara *

He was the author of

INDEX TO THE PROPER NAMES

OCCURING IN

VĀLMĪKI'S RĀMĀVANA

(Based on Bombay and Calcutta Editions)

Br

MANMATHA NATHA RAY, M A

PREFATORY NOTE

It is hardly possible to overestimate the value of scientific indexing, especially of works which are considered as forming the basic literature for the cultural study of a nation. From this point of view, the Epics and the Purāṇas occupy the foremost position. Much has been done of late in this direction—though more still remains—for the Mahā bhārata by such eminent scholars as Hopkins and Sorensen, but the Ramāyana seems to have received but scant attention. The labours of Weber, Jacobi and others in connection with the Rāmāyana, like those of Holtzmann, Dahlmann, etc. for the sister Epic, are indeed Isudable, but they cannot render a thorough. Indexing (descriptive, nominal and topical) of these works unnecessary.

So far as Nominal Index is concerned Strensen's work on the Mahabhārsta may be taken to be a model A similar work on the Ramayana has long been felt to be a desideratum Mr Manmatha nātha Roy, MA, a Research Scholar of the Gott Sanskrit College Benares, whom I entrusted with the compilation of an Index of this kind, has just finished his work, and I am glad to introduce it to the public. In the present work the writer has given a descriptive account of all the proper names that occur in the Epic, and in the "Topical Index , which is to follow as a separate work very soon, an attempt has been made to sum up under specific heads the entire contents of the Text. It is expected that this will greatly facilitate a closer study of the Ramayana

The numerical references in the Indea are to the Bangavasi Edition of the Text of 1308 B S, corresponding to the Nirnaya Sagar Edition of 1921

Became visible to all on the expiation of her sin (I. 49, 16). Received Rama and Laksmana hospitably (I. 49. 17-18). Honored by the Devas when reconciled to Gautama (I. 49, 20). (I. 49. 11). Created as the Perfect Being by Brahman, transferred to Gautama as a trust, and then bestowed in

marriage (VII. 30, 19-27). Her violation and consequent mancipation with the help of Rama recalled by Brahman VII. 30. 28-46).

VII -NOTES AND QUIRIES

BY GOPINATH LAVIRAL

(1) -Virgin Worship.

The Mahakalasanhuta says that the best way of propititating Sita is to worship a urigin (SHTRT) and to feed her. The Kaulas are to worship her in the night and the Smartas in afternoon. The virgin should be well bathed, well draped in a piece of multi-coloured cloth and well decorated. She must be one whose beart has not yet been even touched with passion and who has not fallen into love. She must be of 7, 8 or 9 years of age, of fair complexion, of noble butth, and with her parents living. She must not be deformed in body, long haired, with protruding teeth, or betrothed to any body (UNIGIN).

In the Yamala a virgin is said to be of 3 kinds, viz para, apara and parapart. The Virgin was the Sole Existence before the Creation of the Universe and is therefore known by the name of surprise or Primd Energy (MINI)

Names of the virgin from the 1st to the 16th year are as given below—Sandhya, Sarasyati, Tridhtmarti Kahka, Subhaga, Uma, Malini, Kabhika Kalla Samgharsha, Aparajitla, Rudrapi, Bhairari, Mahalak-mi Kulanāyika, Ketrajiti and Chaodhi;

As for the mode of her worship the Mchäkilasamhitä says that the virgin is to be conducted respectfully with music and cutertainments to the door of the hall of worship. The number of virgins to be worshipped must be an odd number, either 5 or 7 or 9 or even 11. Of these the fairest one is to be considered as the Primary (Frequi) One, but if many maiders

are not available one will do In Kamya and Naimittika pujas only one is needed, while in the autumnal worship a large number is a necessity. They are to be kept standing in a row, with their eyes cast down The worshipper is to regard the मुखा as identical with the Goddess herself, take up a cup of wine, and go through the process of pranavama, bhūtapasarana (expulsion of evil spirits), obeisance to Guru and Ganesa, and Digbindhana He is then to wash her feet, place the water on his head and rub her feet with the corner of his own wearing garment. With unbrol en rice (স্মন্তর) he should then perform the ceremony for removing the obstacles(विद्योत्सारण) The ceremonies for expelling the evil influences (भूतापसारण and विमोत्सारण) have to be performed once again, the reason being that many minor gods and goddesses enter the hall of worship together with the Virgin Goddess to see her, and very often they create The worshipper has to take with his left disturbances hand the right hand of the maiden, step forth with his right foot planted first on the ground and lead the line of the maidens on into the hell uttering 5 verses in her praise त्वमम्य जगतामाद्ये जगदाधाररूपिणि &c

The worshin of the gray is enough to please the rest. This is followed by an act of offering to the minor gods. Then follows Kumarin as The names of the 18 maidens and their respective seats in the body Mahrichandra Yogesvari, Siddinkarah, Siddinkarah, Mahanta mari (??), Vajra kapalin Mundamalini Attahasini Chandakapalini, Kala chakresvari, Guhyakah, Kitayani Kamakhya, Chrimunda, Siddinkakini Kubjika, Mataagi, Chandesvari and Kaumari Their respective seats he-d (Rit) face (Hit), eyes, ears, nostrils, cheel , lines of teeth shoulders, heart, arms bell (Mat) buck thighs, knees, hips (Mat), legs and the entire frame

The worships of 9 goddesest-viz Suddhā, Kālikā, Lalitā, Mālini, Vasundharā, Sarassati, Ramā, Gauri and Durgā-and of two gods viz Baruka, a boy of 5 years, and Gageša, of 9 years, are enjoined So also of 8 Bhairavas viz Asitānga Bhairava, Rurus, Chaodas, Rrodhas, Ummatias, Rapilis, Bhisapas and Samharas and of 8 Devis viz Mahāmājā, Kālaratit, Sarvamangalā, Damarukā, Rājarājesvari, Sampatpradā, Bhagavati and Kumari. The 6 Sakiis attendant on the Devis are named Ananga Kusumā, "Manmathā, "Madanā, "Kusumāturā, "Kusumāturā, "Ma

The worship of the grain being over, the remaining maidens should next be attended to They should be allowed to eat of the food offered up to them in silence. No sound of any instrument should be made to disturb them at their meals. The worshipper with folded hands should sing in their praise a hymn called graitledin (16 verses in anusup metre, from the Mahikala Samhita.) After they have taken their food they should be served with betels in due form. This is followed by the offering of dakşina, and finally the ceremony of Visarjana.

The leavings of their dishes should be given to jackais or buried in the earth

The worship of the Virgin is recommended during the Navaritra festival for 9 days in succession. The names of the 9 Durg is to b worshipped on the 9 days we. His lekely, Gagant. Rakti, Maho, bothou mis, hartlikk, lehe'hi, Jötina, Kriya and Durg: I ast of all we trol the fellowing remarkable expression.

यदि सा सोतमापानि रायमेष विलानिती। तथा सद नगेटु राथि पासर पा निर्मातर्थाः ॥ पुमारी न स्कृत्य भाषपुक्तन पेनसा। सन्दर्भा मृत्युमापानि नो शेटु देवी परारुमुग्ती॥
